XPANDIA ACI APPLIED CULTURAL INTELLIGENCE SAS

6 vistas principales:

Vista	Objetivo
Home	Posicionar Xpandia como expertos en español para AI, productos digitales y audiencias hispanohablantes.
Services	Mostrar las 3 líneas: Language Assurance, Localization & Adaptation, Applied Cultural Intelligence.
Language Assurance	Página dedicada a QA audits, AI outputs, launch readiness y fractional quality leadership.
Localization & Adaptation	Página dedicada a traducción premium, localización, transcreation, UX copy y documentación.
Applied Cultural Intelligence	Página dedicada a ACI, trainings, workshops, cultural fit, Hispanic audience strategy.
About / Contact	Credibilidad, experiencia, founder profile, mercados y CTA para diagnóstico.

2. Seguir con la estructura actual

Mantener la estructura visual general del website actual (boutique, premium y claro). El sitio actual tiene buena jerarquía: hero, proof points, servicios, metodología, deliverable, buyers y CTA.

Lo que cambiaría:

1. Reemplazar la idea de “Three focused engagements” por “Three ways we help”.
2. Reformular el bloque “Not a fit”, ahora usaremos lenguaje afirmativo y comercial.
3. Ajustar el copy para que Xpandia no se vea solo como LA, sino como una firma experta en español con 3 líneas.
4. Integrar el nuevo logo en header y footer.
5. Usar el isotipo como favicon.
6. Hacer que el azul del logo sea el color de acento principal.

3. Logo, favicon y paleta

Logo

Recomendaciones técnicas para ProjectApp:

- Header desktop: versión horizontal del logo.
- Header mobile: isotipo + wordmark si cabe; si no, solo isotipo.
- Footer: logo completo.
- Favicon: isotipo cuadrado azul.
- Social preview / Open Graph: logo horizontal sobre fondo claro.

Paleta

El nuevo logo trae estos tonos aproximados:

- Azul principal: **#1C75BC**
- Azul claro / cyan: **#1FB5E7**
- Negro / grafito: **#231F20**
- Fondo claro: blanco o casi blanco

De ser posible mantener una estética premium con:

Uso	Color sugerido
Fondo principal	#FFFFFF
Fondo alterno suave	#F6FAFC
Texto principal	#111827 o #151515
Texto secundario	#4B5563
Azul primario	#1C75BC
Azul acento	#1FB5E7
Borde / líneas	#D9E4EA
Cards suaves	#F8FBFD

No usar demasiados gradientes ni colores adicionales.

VISTA 1 — HOME

Objetivo de la vista

Posicionar a Xpandia como la firma experta en español que ayuda a empresas en EE. UU., Canadá y Europa a lanzar, validar, adaptar y mejorar experiencias digitales para audiencias hispanohablantes.

El visitante debe entender en menos de 10 segundos:

Qué hace Xpandia:

Valida, localiza y adapta experiencias en español.

Para quién:

AI, SaaS, EdTech, Product, Localization, CX y Marketing teams.

Qué problema resuelve:

Ayuda a que productos, IA, contenido y journeys en español sean claros, confiables, culturalmente adecuados y listos para usuarios reales.

Qué vende:

Language Assurance, Localization & Adaptation, Applied Cultural Intelligence.

Nota para diseño

El header debe mantenerse limpio, con mucho aire. Logo a la izquierda, navegación al centro o derecha, CTA como botón sólido en azul principal del logo.

2. Hero Section

Eyebrow

SPANISH EXPERTISE · AI · SAAS · EDTECH · DIGITAL PRODUCTS

H1

Spanish that works for real users.

Subheadline

Xpandia helps AI, SaaS, EdTech, and digital product teams validate, localize, and culturally adapt Spanish experiences for Hispanic and Spanish-speaking audiences.

Primary CTA

Book a diagnostic call

Secondary CTA

Request an audit

Supporting proof bar

20+ years

Global localization and language quality experience

Spanish focus

LatAm, US Hispanic, and regional variants

Built for

AI, Product, Localization, CX, and EdTech teams

Markets

US · Canada · Europe

Nota de diseño

Esta sección debe mantener el look premium actual: fondo limpio, tipografía grande, una frase dominante y CTAs visibles. Aquí el logo nuevo debe sentirse integrado, no decorativo. El azul del isotipo puede usarse en el CTA principal, pequeños acentos y líneas divisorias.

3. Positioning Section

Eyebrow

WHY XPANDIA

Headline

Spanish quality is product quality.

Body copy

Your users experience your product through language: the answers your AI gives, the onboarding copy they follow, the support content they trust, and the messages that help them decide.

Xpandia gives teams the expert Spanish judgment, structured review, cultural insight, and measurable quality signals they need to launch, improve, and scale with confidence.

Supporting line

We combine senior linguistic expertise, applied cultural intelligence, and practical product judgment to help Spanish experiences perform in the real world.

Optional visual callout

Language. Culture. Product judgment.

The three layers behind Spanish that works.

4. Services Overview Section

Eyebrow

SERVICES

Headline

The Spanish expertise your product needs.

Intro copy

Choose the right path based on what your team needs: validate what exists, create or improve Spanish content, or understand the audience behind the language.

Service Card 1

Language Assurance

Tagline

Validate Spanish before your users do.

Description

Structured audits and QA sprints for AI outputs, product flows, support content, launch readiness, and ongoing language quality governance.

Best for

AI products, chatbots, copilots, SaaS platforms, EdTech products, support experiences, and digital journeys already operating in Spanish or preparing to launch.

What you get

Quality scorecards, issue taxonomy, severity ratings, readiness recommendations, prioritized fixes, and executive-ready findings.

Engagements

- AI Spanish Quality Audit Sprint
- Spanish/LatAm Launch Readiness Audit
- AI Output Benchmark
- Chatbot & Support Bot Spanish Audit
- Language Sign-Off / LSO Review
- Fractional Language Quality Lead

CTA

Explore Language Assurance

Service Card 2**Localization & Adaptation****Tagline**

More than translated. Spanish that feels native, clear and trusted.

Description

Customized Spanish localization, transcreation, UX copy, documentation, and regional adaptation for digital products and content.

Best for

Teams launching websites, product interfaces, help centers, marketing campaigns, learning content, or customer communications in Spanish.

What you get

Localized copy, adapted messaging, terminology guidance, regional fit recommendations, QA-ready content, and publication-ready Spanish assets.

Services included

- Website Localization

- Product UI Localization
- Marketing Localization & Transcreation
- Help Center / Documentation Localization
- EdTech Content Localization
- Regional Spanish Adaptation
- Localization Review & Repair

CTA

Explore Localization & Adaptation

Service Card 3

Applied Cultural Intelligence

Tagline

Make Spanish resonate.

Description

Advisory, workshops, audits, and training that help teams understand Hispanic and Spanish-speaking audiences, cultural expectations, trust signals, tone, and market fit.

Best for

Product, marketing, CX, localization, and leadership teams that need to connect with Spanish-speaking users across the US, Canada, Europe, and LatAm.

What you get

Cultural insight, audience-specific recommendations, messaging guidance, training sessions, market fit findings, and actionable strategy.

Services included

- Spanish Market Fit Audit
- Hispanic Audience Messaging Review
- Culturalization Audit
- Regional Fit Strategy
- Cultural Intelligence Workshops
- CQ / ACI Training
- Executive Talks & Briefings

Explore Applied Cultural Intelligence

5. Methodology Section

Eyebrow

METHODOLOGY

Headline

The method behind Spanish that works.

Intro copy

Every engagement follows a clear process: define the audience, evaluate the experience, identify risks, and deliver recommendations your team can act on.

Step 1

Define

We clarify your use case, audience, Spanish variant, product surface, business goal, and what “good” needs to mean for your team.

Step 2

Evaluate

We review language, meaning, tone, terminology, clarity, cultural fit, UX friction, and quality risks using structured criteria.

Step 3

Prioritize

We separate critical issues from quick wins and organize findings by severity, business impact, and implementation effort.

Step 4

Improve

We deliver recommendations, rewrites, standards, scorecards, and next steps your product, localization, AI, or CX team can execute.

6. Deliverables Section

Eyebrow

THE DELIVERABLES

Headline

Evidence your team can act on.

Body copy

Every Xpandia engagement turns expert judgment into practical evidence: scorecards, findings, examples, recommendations, and decision-ready guidance.

Deliverable Card 1

Quality Scorecard

Measurable scoring across the criteria that matter for your use case: accuracy, clarity, naturalness, tone, terminology, regional fit, cultural fit, UX friction, and risk.

Deliverable Card 2

Issue Taxonomy

A structured list of what is breaking quality, where it happens, how severe it is, and what your team should fix first.

Deliverable Card 3

Executive Readout

A concise summary for product, AI, localization, CX, or leadership teams with risks, opportunities, and recommended next steps.

Deliverable Card 4

Remediation Guidance

Practical recommendations, rewrites, examples, and standards to help your team improve Spanish quality without slowing down delivery.

Optional scorecard labels

Accuracy

Clarity

Naturalness

Tone & register

Terminology

Regional fit

Cultural fit

UX friction

Instruction-following

Risk severity

7. Built For Section

Eyebrow

BUILT FOR

Headline

For teams building products and experiences in Spanish.

Audience Card 1

AI & ML Product Teams

Validate Spanish outputs from chatbots, tutors, copilots, agents, and generative AI experiences before users rely on them.

Audience Card 2

SaaS & Product Teams

Improve Spanish product flows, onboarding, UI copy, forms, errors, and launch readiness.

Audience Card 3

EdTech Teams

Make Spanish learning experiences clear, natural, culturally relevant, and pedagogically effective.

Audience Card 4

Localization Teams

Strengthen Spanish quality, vendor oversight, review workflows, terminology, and sign-off processes.

Audience Card 5

CX & Support Teams

Improve Spanish help content, support macros, chatbot responses, and customer-facing communication.

Audience Card 6

Marketing & Growth Teams

Adapt Spanish messaging, landing pages, campaigns, and conversion copy for real Hispanic and Spanish-speaking audiences.

8. Buyer Section

Eyebrow

WHO WE HELP

Headline

Built for the leaders responsible for Spanish quality.

- Head of Product
 - VP Product
 - AI / ML Product Lead
 - Director of Localization
 - Head of Globalization
 - VP Customer Experience
 - Customer Support Leader
 - EdTech Content Leader
 - Marketing / Growth Lead
 - Trust & Safety Lead
-

9. Final CTA Section

Eyebrow

NEXT STEP

Know where your Spanish stands — and what to do next.

In a focused diagnostic call, we review your Spanish surface, understand your audience, product context, timeline, and business goal, and recommend the right path forward: an audit, an AI QA sprint, a localization engagement, a CQ talk, or a quality roadmap.

Engagements start from \$500.

Diagnostics, audits, AI QA sprints, localization engagements, CQ talks, and fractional advisory are scoped based on your product, audience, complexity, timeline and business priority.

CHOOSE THE RIGHT PATH

Headline

What does your team need to solve?

Intro copy

Start with the outcome your team needs. Xpandia structures each engagement around a clear business question: is your Spanish ready, does it need to be adapted, or does your team need deeper cultural insight?

Decision Card 1

Need to know if your Spanish is ready?

Choose Language Assurance

For teams that already have Spanish outputs, product flows, support content, AI responses, or localized experiences and need expert validation before launch, scale, or release.

Best when you need to:

- Evaluate Spanish AI outputs.
- Audit a product or customer journey in Spanish.
- Identify quality risks before deployment.
- Prioritize fixes by severity and business impact.
- Create standards for ongoing Spanish quality.

CTA

Explore Language Assurance

Decision Card 2

Need to create or improve Spanish content?

Choose Localization & Adaptation

For teams that need websites, product copy, documentation, support content, marketing, or learning materials translated, localized, adapted, repaired, or made more natural in Spanish.

Best when you need to:

- Localize a website, app, or product interface.
- Adapt marketing copy for Spanish-speaking audiences.
- Improve existing translated content.
- Create Spanish support or help center content.
- Adapt terminology, tone, and regional Spanish.

CTA

Explore Localization & Adaptation

Decision Card 3

Need to resonate with your Spanish audience beyond language?

Choose Applied Cultural Intelligence

For teams that need cultural insight, market fit, messaging guidance, training, and strategic direction to connect with Hispanic and Spanish-speaking audiences.

Best when you need to:

- Understand cultural expectations and trust signals.
- Improve messaging for Hispanic audiences.

- Prepare teams for Spanish-speaking markets.
- Train teams in Cultural Intelligence.
- Identify cultural friction before it affects adoption or conversion.
- Make better product, content, and go-to-market decisions.

CTA

4. Services Overview Cards

Eyebrow

SERVICE LINES

Headline

One Spanish partner. Three specialized capabilities.

Intro copy

Each service line can work independently or as part of a broader quality roadmap. Start with a focused audit, a localization engagement, or an ACI workshop, then scale into governance, training, or ongoing advisory.

Card 1 — Language Assurance

Language Assurance

Tagline

Validate Spanish before your users do.

Overview

Structured Spanish QA audits, AI output evaluations, launch readiness reviews, and quality leadership for teams that need confidence before shipping Spanish experiences.

When to use it

- AI-generated Spanish that may be inaccurate, unnatural, inconsistent, or risky.
- Product flows that are translated but not ready for real users.
- Spanish content that lacks measurable quality standards.

- Teams that rely on vendors, reviewers, or internal speakers without a clear QA framework.
- Releases that need expert linguistic sign-off before deployment.

Best for

AI, SaaS, EdTech, Product, Localization, CX, Support, and Trust & Safety teams that already have Spanish outputs or experiences and need to validate quality.

Core engagements

- AI Spanish Quality Audit Sprint.
- Spanish/LatAm Launch Readiness Audit.
- AI Output Benchmark.
- Chatbot & Support Bot Spanish Audit.
- Language Sign-Off / LSO Review.
- Fractional Language Quality Lead.
- Terminology & Style QA.
- Spanish Quality Governance Kit.

What you get

- ✓ Quality scorecard.
- ✓ Issue taxonomy.
- ✓ Severity ratings.
- ✓ Readiness recommendation.
- ✓ Prioritized remediation backlog.
- ✓ Executive readout.
- ✓ QA rubric or governance recommendations when needed.

Engagement starting points

Diagnostics from \$500

Launch readiness audits from \$3,500

AI QA sprints from \$4,500

Fractional advisory from \$3,000/month

Timeline

Most audits and sprints: **7–15 business days**

Fractional advisory: **monthly engagement**

CTA

Explore Language Assurance

Card 2 — Localization & Adaptation

Localization & Adaptation

Tagline

Not just translated. Adapted for Spanish-speaking audiences.

Overview

Customized Spanish localization, transcreation, UX copy, documentation, and regional adaptation for digital products and content.

When to use it

- English-first products or content that need a professional Spanish version.
- Existing translations that sound literal, inconsistent, or disconnected from the audience, and do not convert as they should.
- Product UI, help content, or marketing copy that needs to feel natural in Spanish.
- Spanish experiences that need regional adaptation for LatAm, US Hispanic, or specific markets.
- Content that needs to support conversion, clarity, trust, and user action.

Best for

SaaS, EdTech, AI, Product, Marketing, CX, Support, and Localization teams launching or improving Spanish content, interfaces, campaigns, documentation, or learning experiences.

Core engagements

- Content Localization.
- Product UI Localization.
- Marketing Localization & Transcreation.
- Help Center / Documentation Localization.
- EdTech Content Localization.
- Support Macro Adaptation.
- Regional Spanish Adaptation.
- Localization Review & Repair.

- Spanish Copy Adaptation.

What you get

- ✓ Localized Spanish copy.
- ✓ Adapted product or marketing content.
- ✓ Transcreation options when needed.
- ✓ Terminology guidance.
- ✓ Regional fit recommendations.
- ✓ QA-ready files.
- ✓ Publication-ready Spanish assets.

Engagement starting points

Review & repair projects from **\$2,500**

Content/product localization from **\$3,000+**

Transcreation/strategic adaptation scoped by campaign or content type

Timeline

Focused projects: **5–10 business days**

Larger localization engagements: **2–6 weeks**, depending on scope

CTA

Explore Localization & Adaptation

Card 3 — Applied Cultural Intelligence

Applied Cultural Intelligence

Tagline

Read the invisible rules behind trust, culture, and growth.

Overview

Cultural intelligence audits, talks, executive briefings, workshops, and advisory for teams that need to understand Hispanic and Spanish-speaking audiences, reduce cultural friction, and make better product, content, marketing, CX, and go-to-market decisions.

When to use it

- Spanish content is accurate, but does not fully connect with the audience.
- Messaging misses trust signals, tone, context, or cultural expectations.

- Product, marketing, CX, or localization teams need stronger cultural insight before making decisions.
- Teams are entering Hispanic, LatAm, US Hispanic, or Spanish-speaking markets without a clear audience framework.
- Global teams need to improve cross-cultural communication, collaboration, and business readiness.
- Leaders need to understand the invisible protocols, red lines, and expectations that shape how people work, buy, decide, and respond.

Best for

Product, Marketing, Growth, CX, Localization, EdTech, Leadership, People, Global Operations, and AI teams serving Hispanic, LatAm, US Hispanic, or Spanish-speaking audiences.

Core engagements

- Spanish Market Fit Audit.
- Hispanic Audience Messaging Review.
- Culturalization Audit.
- Regional Fit Strategy.
- Cultural Intelligence Talks.
- Executive Briefings.
- CQ / ACI Workshops.
- Go-to-Market Cultural Advisory.
- Inclusive & Accessible Spanish Communication Review.

What you get

- Cultural insight report.
- Audience-specific recommendations.
- Messaging guidance.
- Cultural friction map.
- Market fit findings.
- Talk, briefing, or workshop materials.
- Practical CQ framework.

- Actionable strategy for product, content, marketing, CX, leadership, or go-to-market teams.

Starting price

Focused ACI audits from \$3,500
 Cultural Intelligence talks from \$1,500
 Executive briefings from \$2,500
 Custom workshops from \$4,500
 Strategic advisory from \$3,000/month

Timeline

Talks and briefings: single session
 Workshops: single session or half-day
 Audits: 7–15 business days
 Advisory: monthly engagement

CTA

Explore Applied Cultural Intelligence

5. Comparison Section

Eyebrow

HOW TO CHOOSE

Headline

The difference is simple: validate, adapt, or understand.

If your team needs to...	Choose	Primary outcome
Know whether Spanish outputs, product flows, or support content are ready to ship	Language Assurance	Quality validation and readiness
Create, improve, or repair Spanish content, UI, documentation, or marketing	Localization & Adaptation	Spanish content built for real users
Understand Hispanic/LatAm audiences, cultural expectations, trust, and market fit	Applied Cultural Intelligence	Better decisions for Spanish-speaking markets

Supporting copy

Many teams start with an audit, then move into localization, cultural adaptation, training, or ongoing quality leadership. Xpandia can support a focused need or help build a broader Spanish quality roadmap.

6. Recommended Starting Points Section

Eyebrow

START HERE

Headline

Focused engagements designed to create momentum.

Intro copy

Start with a defined scope, clear deliverables, and practical recommendations your team can act on quickly.

Starting Point 1

AI Spanish Quality Audit Sprint

Best for

Teams with AI outputs, chatbot responses, tutors, copilots, or agents operating in Spanish.

Outcome

Understand quality risks, scoring, issue patterns, and readiness before users rely on the experience.

Sprint deliverables

- Representative output review.
- QA rubric.
- Scorecard.
- Issue taxonomy.
- Severity ratings.
- Remediation guidance.
- Executive readout.

Engagement starts at

From \$4,500

Timeline

10 business days

CTA

Request an AI QA Sprint

Starting Point 2

Spanish/LatAm Launch Readiness Audit

Best for

Teams launching or improving a Spanish website, app, onboarding flow, support journey, or customer experience.

Outcome

Identify what affects clarity, trust, UX, cultural fit, and readiness before launch or relaunch.

Audit deliverables

- Journey review.
- Screenshots and annotations.
- Issue log.
- Quick wins.
- Prioritized remediation backlog.
- Readiness recommendation.

Engagement starts at

From \$3,500

Timeline

10–12 business days

CTA

Request a Launch Readiness Audit

Starting Point 3

Localization Review & Repair

Best for

Teams with existing Spanish translations that need improvement, consistency, adaptation, or publication readiness.

Outcome

Turn translated Spanish into content that feels natural, clear, trustworthy, and aligned with your audience.

Review deliverables

- Content review.
- Rewrite recommendations.
- Terminology notes.
- Regional fit guidance.
- QA checklist.
- Final-ready copy where scope allows.

Review & Repair starts at

From \$2,500

Timeline

5–10 business days

CTA

Request Localization Review

Starting Point 4

Cultural Intelligence Talks

Tagline

Read the invisible rules of global business.

Overview

Culture is the hidden operating system behind every global interaction. It shapes how people build trust, read timing, respond to hierarchy, give feedback, handle risk, make decisions, and interpret what is said — and what is left unsaid.

Xpandia Talks help leaders and teams decode those invisible rules with clarity, so they can communicate more effectively, reduce costly friction, and build stronger relationships across markets, languages, and audiences.

Best for

Leadership, Product, Marketing, CX, Localization, People, and Global Operations teams working across cultures, markets, languages, or international teams.

Outcome

Your team leaves with a practical understanding of how Cultural Intelligence can improve collaboration, reduce friction, strengthen trust, and support better business decisions across cultures.

Talk themes

- Cultural Intelligence (CQ) for global business.
- The invisible protocols behind trust and communication.
- Cultural red lines and how to avoid crossing them.
- How culture shapes feedback, hierarchy, time, and decision-making.
- Culturalization for products, content, and customer experience.
- Hispanic and Spanish-speaking audience expectations.
- Mindset shifts for more productive global teams.

Talk deliverables

- ✓ 45–60 minute live talk or executive briefing.
- ✓ Pre-call to understand audience and business context.
- ✓ Practical CQ framework.
- ✓ Real business examples tailored to the audience.
- ✓ Optional Q&A.
- ✓ One-page summary or team checklist.
- ✓ Recommended next steps for workshop, audit, or advisory engagement.

CQ/ACI talks start at

Virtual talks from **\$1,500**

Executive briefings from **\$2,500**

Custom workshops from **\$4,500**

Timeline

Single session. Custom workshops and advisory engagements are scoped based on audience, format, and level of customization.

CTA

Book a CQ Talk

7. Engagement Model Section

Eyebrow

HOW ENGAGEMENTS WORK

Headline

Clear scope. Expert review. Actionable output.

Step 1

Scope the need

We define your audience, Spanish variant, product surface, content type, business objective, timeline, and expected outcome.

Step 2

Review the experience

We evaluate the selected material using expert judgment, structured criteria, and the right mix of linguistic, cultural, UX, and product quality signals.

Step 3

Deliver the evidence

You receive decision-ready findings your team can use immediately: quality scorecards, annotated examples, issue logs, severity ratings, prioritized recommendations, rewrites, standards, and training materials.

Each deliverable connects expert judgment to action: what is working, what needs attention, why it matters, and what your team should do next.

Step 4

Decide the next move

We recommend the right next step: ship, fix, localize, adapt, train, govern, or scale.

8. Pricing Section

Eyebrow

PRICING

Headline

Simple starting points for focused work.

Body copy

Pricing depends on scope, volume, content type, product complexity, and timeline. Most teams begin with a focused audit, sprint, workshop, or localization review.

Pricing cards

Diagnostics

From \$500

Get a fast expert read before Spanish issues turn into user friction, launch delays, or avoidable rework.

Best when your team needs to understand what is happening, what matters most, and which engagement will create the fastest path forward.

Launch Readiness Audits

From \$3,500

Find the issues affecting clarity, trust, UX, conversion, or customer confidence in your Spanish experience.

Designed for product, AI, localization, support, CX, and marketing teams that need structured findings, severity ratings, and prioritized recommendations they can act on now.

AI QA Sprints

From \$4,500

Validate AI-generated Spanish before users rely on or complain about it.

For teams evaluating chatbot responses, copilots, tutors, agents, support flows, or other AI outputs that need to be accurate, natural, safe, consistent, and ready for real Spanish-speaking users.

Localization & Adaptation

From \$2,500

Turn English-first or underperforming Spanish content into experiences that feel clear, natural, and built for your audience.

For websites, product copy, help content, campaigns, learning materials, and Spanish content that needs to support trust, conversion, comprehension, and action.

Cultural Intelligence Talks & Workshops

Talks from \$1,500 · Briefings from \$2,500 · Workshops from \$4,500

Help global teams read the invisible rules behind trust, communication, decision-making, and market readiness.

For leaders and teams that need Cultural Intelligence talks, executive briefings, or custom workshops on cross-cultural communication, culturalization, Spanish-speaking audiences, and global business growth.

Fractional Advisory

From \$3,000/month

Bring senior Spanish Localization QA leadership into your team without a full-time hire.

For companies that need ongoing governance, vendor ops oversight, QA frameworks, review workflows, terminology standards, quality dashboards, or strategic guidance to scale Spanish quality with confidence.

Pricing note

Final pricing is confirmed after a short diagnostic call and scope review.

We will help you identify the fastest, most practical path to improve Spanish quality, reduce risk, and move your product, content, or team forward.

9. CTA Section

Eyebrow

NEXT STEP

Headline

Explore Xpandia services for Spanish Language Assurance, Localization & Adaptation, and Applied Cultural Intelligence for AI, SaaS, EdTech, and digital product teams.

H1

The Spanish expertise your product needs.

Suggested URL

/services

Suggested Open Graph Title

Xpandia Services | Spanish expertise for AI, SaaS, EdTech, and digital product teams

Suggested Open Graph Description

Validate, localize, and culturally adapt Spanish experiences for Hispanic and Spanish-speaking audiences.

Diseño recomendado para Vista 2

La página debe sentirse como un HUB de servicios premium, no como una lista larga.

Layout sugerido

1. Hero corto.
2. Tres decision cards.
3. Tres service line cards más completas.
4. Comparison table.
5. Recommended starting points.
6. Engagement model.

7. Pricing starting points.

8. CTA final.

Recomendaciones visuales

- Usar cards grandes, no listas largas.
- Cada línea de servicio debe tener su propio bloque visual.
- Usar el azul principal para CTAs.
- Usar el cyan como acento secundario.
- Mantener fondos claros.
- Incluir tablas simples solo donde ayuden a decidir.
- No usar demasiados íconos genéricos.
- Usar el isotipo de Xpandia como patrón muy sutil o marcador de sección.

Nota para ProjectApp

En esta vista, los usuarios deben poder elegir en menos de 30 segundos si necesitan:

Validate → Language Assurance

Adapt → Localization & Adaptation

Understand → Applied Cultural Intelligence

Esa triada debe guiar toda la experiencia de la página.

La vista #3 debe ser la página más importante después del Home y Services, porque es la línea central y diferenciadora de Xpandia. Debe explicar con claridad que **Language Assurance no es traducción ni proofreading**, sino una capa experta de validación, QA, readiness y gobernanza para español en IA, productos digitales, soporte, contenido y lanzamientos.

También conviene conectar la narrativa con el lenguaje que el mercado ya entiende en IA: testing, evaluation, validation, verification, risk, trust, readiness. NIST, por ejemplo, trabaja en TEVV —testing, evaluation, validation and verification— como base para sistemas de IA confiables, y su AI Risk Management Framework busca ayudar a gestionar riesgos asociados con IA.

Spanish Language Assurance for AI, Product & CX Teams | Xpandia

Meta Description

Xpandia helps AI, SaaS, EdTech, Product, Localization, and CX teams validate Spanish quality across AI outputs, product flows, support content, and launch-ready experiences.

1. Hero Section

Eyebrow

LANGUAGE ASSURANCE

H1

Validate Spanish before your users do.

Subheadline

Xpandia helps AI, SaaS, EdTech, Product, Localization, and CX teams evaluate Spanish quality across AI outputs, product experiences, support content, and launch-ready journeys.

Supporting copy

We turn expert Spanish judgment into measurable findings your team can act on: scorecards, issue taxonomies, severity ratings, readiness recommendations, and remediation guidance.

Primary CTA

Request a Language Assurance audit

Secondary CTA

Book a diagnostic call

Hero proof points

AI outputs

Chatbots, copilots, tutors, agents, and support flows.

Product readiness

UX copy, onboarding, forms, errors, and launch journeys.

Decision-ready evidence

Scorecards, severity ratings, issue logs, and executive readouts.

2. Problem / Positioning Section

Eyebrow

WHY LANGUAGE ASSURANCE

Headline

Spanish quality is too important to leave unmeasured.

Body copy

Spanish-speaking users experience your product through language: the answers your AI gives, the instructions your product provides, the support content they trust, and the messages that guide their decisions.

When Spanish quality is inconsistent, unnatural, culturally misaligned, or hard to understand, teams lose clarity, trust, adoption, and confidence before they even know where the issue started.

Language Assurance gives your team a structured way to evaluate what is working, what needs attention, how severe each issue is, and whether the experience is ready for real users.

Optional callout

The goal is simple: help your team know whether your Spanish is accurate, natural, trustworthy, culturally appropriate, and ready to ship.

3. What Language Assurance Covers

Eyebrow

WHAT WE EVALUATE

Headline

Spanish quality across every user-facing surface.

Intro copy

Language Assurance can be applied to any Spanish experience your users see, read, hear, follow, or rely on.

Coverage cards

AI-generated outputs

Chatbot responses, AI tutors, copilots, agents, support replies, generated explanations, summaries, recommendations, and other model outputs in Spanish.

Product experiences

Onboarding flows, UI copy, forms, empty states, error messages, notifications, tooltips, checkout flows, and release-critical product surfaces.

Support and CX content

Help center articles, support macros, chatbot flows, escalation language, knowledge base content, and customer-facing communication.

Marketing and conversion content

Landing pages, campaign copy, email flows, pricing pages, value propositions, trust messaging, and Spanish conversion paths.

Localization quality

Translated or localized experiences that need expert review, consistency checks, regional fit, terminology alignment, or final sign-off.

Launch readiness

Spanish product surfaces, AI experiences, or customer journeys that need validation before launch, relaunch, deployment, or scale.

4. When to Use Language Assurance

Eyebrow

WHEN TO USE IT

Headline

Use Language Assurance when Spanish quality needs a decision.

Bullets

- Your AI generates Spanish outputs, but your team needs to know if users can trust them.
 - Your product is translated or localized, but you are unsure if it feels natural, clear, and ready.
 - Your team is preparing a Spanish launch, relaunch, release, or market expansion.
 - Your support, help center, or chatbot experience in Spanish needs quality validation.
 - Your team relies on vendors, reviewers, or internal speakers without a clear QA framework.
 - Your Spanish content has inconsistencies in tone, terminology, clarity, or regional fit.
 - Your leadership team needs evidence, not opinions, before deciding what to fix or ship.
-

5. Core Evaluation Criteria

Eyebrow

QUALITY CRITERIA

Headline

The signals behind Spanish your team can trust.

Intro copy

Each engagement is scoped around your product, audience, use case, and risk level. Depending on the project, we evaluate the criteria that matter most for your Spanish experience.

Criteria cards

Accuracy

Does the Spanish preserve the intended meaning, facts, instructions, and product logic?

Clarity

Can users understand what to do, what is happening, and what the product is asking from them?

Naturality

Does the language sound fluent, native, and appropriate for real Spanish-speaking users?

Tone and register

Does the voice match your brand, audience, context, and level of formality?

Terminology

Are product terms, feature names, support language, and key concepts consistent and usable?

Regional fit

Does the Spanish align with the intended audience: LatAm, US Hispanic, Spain, or a specific regional variant?

Cultural fit

Does the experience respect cultural expectations, trust signals, context, and audience perception?

Instruction-following

Does the Spanish output follow the user request, product instructions (KB), task constraints, system guardrails, and expected response format?

UX friction

Does language create confusion, hesitation, errors, abandonment, or unnecessary cognitive load?

AI behavior

For AI outputs, does the system follow instructions, stay consistent, avoid risky language, and respond appropriately in Spanish?

Readiness

Is the experience ready to ship, needs targeted fixes, or requires deeper remediation before release?

6. Core Engagements**Eyebrow**

CORE ENGAGEMENTS

Headline

Focused audits, QA sprints, and quality leadership.

Intro copy

Start with a focused engagement, then scale into deeper QA, remediation, governance, or ongoing advisory when needed.

Engagement 1

AI Spanish Quality Audit Sprint

Best for

Teams with AI outputs, chatbot responses, tutors, copilots, support agents, or generative AI experiences operating in Spanish.

Outcome

Understand quality risks, scoring, issue patterns, and readiness before users rely on the experience.

Sprint deliverables

- ✓ Representative output review.
- ✓ QA rubric.
- ✓ Quality scorecard.
- ✓ Issue taxonomy.
- ✓ Severity ratings.
- ✓ Remediation guidance.
- ✓ Executive readout.

Engagement starts at

From \$4,500

Timeline

10 business days

CTA

Request an AI QA Sprint

Engagement 2

Spanish / LatAm Launch Readiness Audit

Best for

Teams launching or improving a Spanish website, app, onboarding flow, support journey, AI experience, or customer-facing product surface.

Outcome

Identify what affects clarity, trust, UX, cultural fit, and readiness before launch or relaunch.

Audit deliverables

- ✓ Journey review.
- ✓ Screenshots and annotations.
- ✓ Issue log.
- ✓ Quick wins.
- ✓ Prioritized remediation backlog.
- ✓ Readiness recommendation.

Engagement starts at

From \$3,500

Timeline

10–12 business days

CTA

Request a Launch Readiness Audit

Engagement 3**Chatbot & AI Output Audit****Best for**

Teams using AI chatbots, customer support bots, tutors, copilots, assistants, or automated response systems in Spanish.

Outcome

Evaluate whether AI responses are accurate, natural, useful, consistent, culturally appropriate, and safe for real Spanish-speaking users.

Audit deliverables

- ✓ Output sample review.
- ✓ Failure pattern analysis.
- ✓ Severity ratings.

- ✓ Prompt or response-level recommendations.
- ✓ Quality scorecard.
- ✓ Risk and readiness summary.
- ✓ Executive readout.

Engagement starts at

From \$4,500

Timeline

10–15 business days

CTA

Request a Chatbot Audit

Engagement 4

Language Sign-Off / LSO Review

Best for

Teams that need final expert review before publishing, launching, deploying, or approving a Spanish release.

Outcome

Receive a clear release recommendation based on Spanish quality, risk, and readiness.

Review deliverables

- ✓ Final quality pass.
- ✓ Blocker and non-blocker issue list.
- ✓ Severity notes.
- ✓ Release recommendation.
- ✓ Sign-off memo.
- ✓ Quick remediation guidance where applicable.

Engagement starts at

From \$1,500

Timeline

3–5 business days

CTA

Request LSO Review

Engagement 5

Fractional Language Quality Lead

Tagline

Senior Spanish quality leadership without a full-time hire.

Best for

Teams that need senior Spanish quality judgment, localization QA leadership, vendor oversight, review workflows, standards, or recurring governance across AI, product, localization, support, and content operations.

Outcome

Build a practical Spanish quality system your team can use to make better decisions, reduce review friction, align vendors and internal reviewers, and scale Spanish quality with confidence.

Overview

Xpandia gives your team access to senior language quality leadership on a fractional basis — so you can get expert judgment, standards, governance, and decision support without hiring a full-time language quality leader.

This engagement is designed for teams that already have Spanish content, AI outputs, localization workflows, vendors, reviewers, or recurring releases, but need a clearer operating system for quality: what to review, who owns it, how to score it, when to escalate, and how to know if Spanish is ready to ship.

Advisory deliverables

- ✓ Senior Spanish quality judgment for AI, product, localization, support, and content decisions.
- ✓ 2–4 working sessions or reporting touchpoints per month, depending on scope.
- ✓ Monthly quality dashboard with risks, progress, blockers, and priorities.
- ✓ QA framework tailored to your product, audience, Spanish variant, and risk level.
- ✓ Governance charter defining ownership, review stages, escalation paths, and sign-off rules.
- ✓ Review workflow for internal teams, vendors, reviewers, or AI-generated content.
- ✓ Terminology and style recommendations to improve consistency across touchpoints.

- ✓ Vendor or reviewer scorecards to align expectations and improve quality accountability.
- ✓ Issue taxonomy and severity model for recurring Spanish quality decisions.
- ✓ Roadmap for continuous improvement across Spanish quality, localization, AI outputs, and product readiness.

Advisory rhythm

Depending on scope, the engagement can include:

- Biweekly working sessions.
- Monthly executive readout.
- Async review and decision support.
- Quality dashboard updates.
- Vendor/reviewer alignment sessions.
- Quarterly roadmap review for ongoing engagements.

Advisory starts at

From \$3,000/month

Timeline

Monthly engagement

Recommended minimum: 3 months

**One month can be used for diagnosis, but three months allow us to demonstrate real value: framework, workflow, dashboard, vendor alignment and roadmap.*

CTA

Explore Fractional Advisory

7. Methodology Section

Eyebrow

METHODOLOGY

Headline

A structured path from Spanish review to release confidence.

Intro copy

Every Language Assurance engagement follows a clear process designed to move your team from uncertainty to evidence.

Step 1

Scope the surface

We define your audience, Spanish variant, product surface, AI use case, content type, business objective, risk level, and timeline.

Step 2

Evaluate quality

We review the selected material using expert Spanish judgment and structured criteria: accuracy, clarity, naturalness, tone, terminology, regional fit, cultural fit, UX friction, and readiness.

Step 3

Score and classify

We organize findings by severity, impact, pattern, and implementation effort so your team can understand what matters most.

Step 4

Deliver the evidence

You receive decision-ready findings your team can use immediately: scorecards, annotated examples, issue logs, severity ratings, prioritized recommendations, rewrites, standards, and executive readouts.

Each deliverable connects expert judgment to action: what is working, what needs attention, why it matters, and what your team should do next.

Step 5

Decide the next move

We recommend the right path forward: ship, fix, retest, localize, adapt, train, govern, or scale.

8. Deliverables Section

Eyebrow

THE DELIVERABLES

Headline

Evidence your team can use across product, AI, localization, and CX.

Body copy

Language Assurance turns subjective feedback into structured findings your team can prioritize, share, and execute.

Deliverable cards

Quality Scorecard

A measurable view of Spanish quality across the criteria that matter for your use case.

Issue Taxonomy

A structured map of issue types, patterns, and recurring quality risks.

Severity Ratings

Clear prioritization so your team knows what blocks launch, what should be fixed soon, and what can be improved over time.

Annotated Examples

Specific examples that show where quality breaks down and how it affects the user experience.

Remediation Guidance

Practical recommendations, rewrites, terminology notes, and next steps to help your team improve quickly.

Executive Readout

A concise summary for Product, AI, Localization, CX, Support, Marketing, or leadership teams.

Readiness Recommendation

A clear assessment of whether the Spanish experience is ready to ship, needs targeted fixes, or requires deeper remediation.

9. Built For Section

Eyebrow

BUILT FOR

Headline

For teams responsible for Spanish quality.

Audience cards

AI & ML Product Teams

Validate Spanish outputs from chatbots, copilots, tutors, agents, and generative AI experiences.

Product Teams

Evaluate onboarding, UI copy, forms, errors, and Spanish product flows before launch or relaunch.

Localization Teams

Strengthen QA standards, reviewer alignment, vendor oversight, terminology, and sign-off processes.

CX & Support Teams

Improve Spanish support responses, help content, support macros, chatbot flows, and customer communication.

EdTech Teams

Validate Spanish learning experiences, explanations, quizzes, tutor responses, and pedagogical clarity.

Trust & Safety Teams

Assess Spanish responses, user-facing content, or AI outputs that may carry reputational, safety, or user trust risks.

10. Pricing Section

Eyebrow

STARTING POINTS

Headline

Start with the level of assurance your team needs now.

Body copy

Language Assurance engagements are scoped based on your product surface, audience, Spanish variant, sample size, complexity, risk level, and timeline.

Pricing cards

Diagnostic

From \$500

Get a fast expert read on your Spanish surface before choosing the right audit, sprint, or quality roadmap.

Launch Readiness Audit

From \$3,500

Evaluate a Spanish product, website, onboarding flow, support journey, or customer-facing experience before launch or relaunch.

AI QA Sprint

From \$4,500

Validate AI-generated Spanish outputs before users rely on them.

Language Sign-Off / LSO

From \$1,500

Get a final expert review and release recommendation before publishing or deploying a Spanish experience.

Fractional Advisory

From \$3,000/month

Bring senior Spanish quality leadership into your team without a full-time hire.

Pricing note

Final pricing is confirmed after a short diagnostic call and scope review.

11. FAQ Section

Eyebrow

FAQ

Headline

Common questions about Language Assurance.

Is Language Assurance the same as translation?

No. Language Assurance evaluates whether existing Spanish outputs, content, product flows, or localized experiences are accurate, natural, consistent, culturally appropriate, and ready for users.

Can Xpandia review AI-generated Spanish?

Yes. We evaluate AI-generated Spanish from chatbots, copilots, tutors, support agents, assistants, and other generative AI experiences.

Do you only review LatAm Spanish?

No. We can scope the engagement around the Spanish variant your product needs: LatAm, US Hispanic, Spain, neutral Spanish, or a specific regional market.

What do we need to provide?

Usually a representative sample of outputs, product screens, flows, content, prompts, support responses, or localized assets, plus context about audience, product goals, and launch timeline.

Can you help us fix the issues too?

Yes. Depending on scope, we can provide rewrites, remediation guidance, terminology notes, reviewer guidance, or a follow-up localization/adaptation engagement.

Can this become ongoing support?

Yes. Teams can start with an audit or sprint and move into fractional advisory, governance, recurring QA, vendor oversight, or quality roadmap support.

12. Final CTA Section

Eyebrow

NEXT STEP

Headline

Know if your Spanish is ready before users decide for you.

Body copy

Book a diagnostic call to review your Spanish surface, audience, use case, timeline, and business goal. We'll recommend the right Language Assurance path: diagnostic, audit, AI QA sprint, LSO review, or fractional quality leadership.

Pricing callout

Language Assurance engagements start from \$500.

Primary CTA

Book a diagnostic call

Secondary CTA

Request a Language Assurance audit

Footer

Usar el mismo footer del Home.

Nota para ProjectApp

Esta página debe sentirse más seria y “evidence-driven” que la Home. Visualmente puede usar:

- scorecard mockup,
- issue severity labels,
- readiness status indicators,
- sample QA criteria,
- annotated screenshot preview,
- “Ready / Needs fixes / Not ready” visual status.

La página no debe sentirse como “revisión lingüística”. Debe sentirse como una **quality assurance and readiness layer** para equipos que necesitan tomar decisiones sobre español en productos, IA, soporte y contenidos.

Vista 4 = Localization & Adaptation.

Esta página debe posicionar la localización como una línea premium, pero sin sonar inaccesible ni “agencia tradicional”. La diferencia clave debe quedar clarísima:

Localization & Adaptation creates or improves the Spanish experience. Language Assurance validates whether it is ready.

La página debe vender que Xpandia no solo traduce textos: adapta producto, contenido, UX copy, documentación, campañas y materiales para que funcionen con audiencias hispanohablantes reales. Esto es consistente con cómo se entiende la localización en UX/product: no es solo traducción, sino adaptación lingüística, cultural, funcional y de experiencia para una audiencia específica.

VISTA 4 — LOCALIZATION & ADAPTATION

Suggested URL

/localization-adaptation

SEO Title

Spanish Localization & Adaptation for Digital Products | Xpandia

Meta Description

Xpandia helps SaaS, AI, EdTech, Product, Marketing, CX, and Localization teams translate, localize, transcreate, and adapt Spanish content, product copy, documentation, and campaigns for real Spanish-speaking audiences.

1. Hero Section

Eyebrow

LOCALIZATION & ADAPTATION

H1

More than translated. Built for Spanish-speaking audiences.

Subheadline

Xpandia helps SaaS, AI, EdTech, Product, Marketing, CX, and Localization teams create, improve, and adapt Spanish content, product experiences, documentation, and campaigns so they feel clear, natural, trustworthy, and ready for real users.

Supporting copy

We combine senior Spanish expertise, localization judgment, UX awareness, and cultural adaptation to help your content work across the moments that matter: product use, onboarding, support, learning, marketing, and conversion.

Primary CTA

Request a localization review

Secondary CTA

Book a diagnostic call

Hero proof points

Product-ready Spanish

UI copy, onboarding, forms, errors, flows, and user-facing product content.

Content that connects

Websites, campaigns, help centers, learning materials, and customer communication.

Audience-aware adaptation

LatAm, US Hispanic, Spain, neutral Spanish, or specific regional markets.

2. Positioning Section

Eyebrow

WHY LOCALIZATION & ADAPTATION

Headline

Translation helps users read. Localization helps users trust, understand, and act.

Body copy

A Spanish version can be technically correct and still feel foreign, literal, inconsistent, or disconnected from the audience. That gap affects clarity, trust, UX, conversion, support, learning, and product adoption.

Localization & Adaptation closes that gap. We help teams create or improve Spanish experiences that respect the product context, the user journey, the audience, the market, and the business goal.

Supporting line

The goal is not just Spanish content. The goal is Spanish that feels intentional, usable, and aligned with how your audience thinks, decides, learns, and acts.

3. What We Localize & Adapt

Eyebrow

WHAT WE ADAPT

Headline

Spanish content across the full user journey.

Intro copy

Localization & Adaptation can support any Spanish touchpoint your audience reads, follows, clicks, learns from, or uses to make a decision.

Coverage cards

Websites and landing pages

Homepage, service pages, pricing pages, product pages, landing pages, FAQs, lead-generation flows, and conversion copy.

Product UI and UX copy

Buttons, menus, settings, empty states, onboarding, tooltips, notifications, error messages, forms, and product flows.

Marketing and campaigns

Email campaigns, ads, launch messaging, sales decks, lead magnets, newsletters, social content, and campaign concepts.

Help center and documentation

Knowledge base articles, FAQs, how-to guides, support content, release notes, product documentation, and user education.

EdTech and learning content

Lessons, scripts, quizzes, instructions, assessments, learner feedback, tutoring content, and educational explanations.

Support and CX communication

Macros, support replies, chatbot scripts, escalation language, customer emails, and service recovery messages.

4. When to Use Localization & Adaptation

Eyebrow

WHEN TO USE IT

Headline

Use it when Spanish needs to feel native, clear, and useful.

Bullets

- Your English-first product, website, content, or campaign needs a professional Spanish version.
 - Your existing Spanish translation sounds literal, generic, inconsistent, or disconnected from the audience.
 - Your product UI, help content, or marketing copy needs to feel natural and trustworthy in Spanish.
 - Your Spanish experience needs regional adaptation for LatAm, US Hispanic, Spain, or a specific market.
 - Your content needs to support conversion, clarity, trust, learning, or user action.
 - Your team needs Spanish copy that works in context, not isolated strings or word-by-word translation.
 - Your audience understands the words, but the experience still does not feel made for them.
-

5. Core Adaptation Criteria

Eyebrow

ADAPTATION CRITERIA

Headline

The signals behind Spanish that feels made for the user.

Intro copy

Each localization engagement is scoped around your audience, market, product context, content type, and business goal. Depending on the project, we adapt for the criteria that matter most.

Criteria cards

Meaning

Does the Spanish preserve the intent, message, and product logic of the original content?

Clarity

Can users understand what the content means, what action to take, and why it matters?

Naturality

Does the Spanish sound fluent, native, and appropriate for real Spanish-speaking users?

Tone and voice

Does the Spanish match your brand, audience, product context, and level of formality?

Terminology

Are product terms, feature names, support language, and key concepts consistent and usable?

Regional fit

Does the Spanish align with the intended audience: LatAm, US Hispanic, Spain, neutral Spanish, or a specific regional market?

Cultural fit

Do examples, references, assumptions, tone, trust signals, and communication choices fit the audience?

UX fit

Does the copy work inside the interface, layout, flow, character limits, buttons, forms, and decision points?

Conversion fit

Does the content help users understand, trust, decide, continue, buy, sign up, complete, or take the next step?

Publication readiness

Is the content ready for review, QA, stakeholder approval, or publication?

6. Core Engagements**Eyebrow**

CORE ENGAGEMENTS

Headline

Create, improve, or repair your Spanish experience.

Intro copy

Start with a focused localization or adaptation engagement, then move into review, repair, QA, or ongoing Spanish quality leadership when needed.

Engagement 1

Website & Landing Page Localization

Tagline

Turn your English-first website into Spanish that feels built for the audience.

Best for

Teams launching or improving Spanish websites, landing pages, service pages, pricing pages, lead-generation pages, or product marketing pages.

Outcome

Create a Spanish web experience that supports clarity, trust, conversion, brand consistency, and audience fit.

Localization deliverables

- ✓ Localized website or landing page copy.
- ✓ Adapted headlines, body copy, CTAs, FAQs, and conversion sections.
- ✓ Terminology and style notes.
- ✓ Regional fit recommendations.
- ✓ Copy review in context where access is available.
- ✓ QA-ready or publication-ready Spanish copy.

Engagement starts at

From \$2,500

Timeline

5–10 business days, depending on scope.

CTA

Request website localization

Engagement 2

Product UI & UX Copy Localization

Tagline

Make product copy feel clear, usable, and natural in Spanish.

Best for

Product, SaaS, AI, EdTech, and Localization teams localizing or improving Spanish interfaces, onboarding, forms, errors, tooltips, notifications, and user flows.

Outcome

Improve Spanish usability, clarity, consistency, and product readiness across user-facing product surfaces.

Localization deliverables

- ✓ Localized UI strings or product copy.
- ✓ UX copy adaptation for flows, states, and microcopy.
- ✓ Terminology guidance.
- ✓ Character-limit and context notes where applicable.
- ✓ Annotated recommendations for UX friction.
- ✓ QA-ready Spanish copy.

Engagement starts at

From \$3,000

Timeline

7–15 business days, depending on volume and product complexity.

CTA

Request product localization

Engagement 3**Marketing Localization & Transcreation****Tagline**

Adapt the message, not just the words.

Best for

Marketing, Growth, Product Marketing, and Localization teams adapting campaigns, landing pages, emails, ads, sales content, or launch messaging for Spanish-speaking audiences.

Outcome

Create Spanish marketing content that preserves strategic intent while adapting tone, emotion, persuasion, cultural context, and audience expectations.

Adaptation deliverables

- ✓ Localized or transcreated campaign copy.
- ✓ Alternative headlines, claims, CTAs, or message directions.
- ✓ Audience-specific messaging notes.
- ✓ Cultural adaptation rationale.
- ✓ Terminology and tone guidance.
- ✓ Publication-ready Spanish copy.

Engagement starts at

From \$2,500

Timeline

5–10 business days, depending on scope.

CTA

Request marketing adaptation

Engagement 4

Help Center & Documentation Localization

Tagline

Turn support content into Spanish users can actually use.

Best for

Support, CX, Product, EdTech, SaaS, and Localization teams localizing help centers, FAQs, product documentation, how-to guides, support articles, or user education content.

Outcome

Create Spanish support and documentation content that is clear, consistent, useful, and aligned with how users ask for help.

Localization deliverables

- ✓ Localized help center articles or documentation.
- ✓ Terminology and style recommendations.
- ✓ Clarity and usefulness improvements.
- ✓ Structure or readability notes where applicable.
- ✓ Support tone guidance.
- ✓ QA-ready or publication-ready content.

Engagement starts at

From \$3,000

Timeline

1–3 weeks, depending on volume and complexity.

CTA

Request documentation localization

Engagement 5

EdTech & Learning Content Localization

Tagline

Make learning content clear, natural, and pedagogically effective in Spanish.

Best for

EdTech, learning, training, assessment, and content teams adapting lessons, quizzes, scripts, instructions, tutoring content, learner feedback, or educational materials.

Outcome

Create Spanish learning content that supports comprehension, engagement, cultural relevance, and pedagogical clarity.

Localization deliverables

- ✓ Localized learning content.
- ✓ Adapted examples, instructions, feedback, and assessments.
- ✓ Tone and learner-level recommendations.
- ✓ Cultural and regional fit notes.
- ✓ Pedagogical clarity review.
- ✓ QA-ready or learner-ready Spanish content.

Engagement starts at

From \$4,000

Timeline

2–4 weeks, depending on content type and volume.

CTA

Request learning content localization

Engagement 6

Localization Review & Repair

Tagline

Turn translated Spanish into Spanish that works.

Best for

Teams with existing Spanish translations that need improvement, consistency, adaptation, regional fit, or publication readiness.

Outcome

Improve translated Spanish so it feels natural, clear, trustworthy, and aligned with your audience.

Review deliverables

- ✓ Content review.
- ✓ Rewrite recommendations.
- ✓ Terminology notes.
- ✓ Regional fit guidance.
- ✓ QA checklist.
- ✓ Final-ready copy where scope allows.

Engagement starts at

From \$2,500

Timeline

5–10 business days

CTA

Request localization review

7. Methodology Section

Eyebrow

METHODOLOGY

Headline

A practical path from English-first to audience-ready Spanish.

Intro copy

Every Localization & Adaptation engagement follows a structured process designed to preserve meaning, adapt context, and make Spanish work for the audience.

Step 1

Understand the context

We clarify your audience, Spanish variant, product surface, content type, business goal, tone, terminology, and publication needs.

Step 2

Adapt the experience

We localize or transcreate the selected content with attention to meaning, clarity, tone, terminology, regional fit, cultural fit, UX context, and user action.

Step 3

Review in context

Where access is available, we review Spanish inside the product, website, document, flow, or layout so the copy works in the real experience.

Step 4

Deliver usable Spanish assets

You receive localized, adapted, QA-ready, or publication-ready Spanish copy, along with notes your team can use: terminology guidance, cultural rationale, regional fit recommendations, and implementation comments.

Step 5

Prepare for launch or QA

We recommend the right next step: publish, QA, sign off, repair, expand, test, or move into Language Assurance for readiness validation.

8. Deliverables Section

Eyebrow

THE DELIVERABLES

Headline

Spanish assets your team can use, publish, and scale.

Body copy

Localization & Adaptation turns source content into Spanish experiences that are clear, natural, consistent, audience-aware, and ready for the next step in your workflow.

Deliverable cards

Localized Copy

Spanish content adapted for your product, brand, audience, and business goal.

Transcreation Options

Alternative messaging directions when direct translation does not carry the same impact.

UX Copy Adaptation

Spanish microcopy that works inside buttons, forms, flows, onboarding, errors, and product states.

Terminology Guidance

Preferred terms, consistency notes, product language, and naming recommendations.

Regional Fit Notes

Guidance for LatAm, US Hispanic, Spain, neutral Spanish, or specific regional markets.

Cultural Adaptation Rationale

Explanation of why certain words, references, tones, or examples should be adapted.

QA-Ready Assets

Spanish copy prepared for internal review, implementation, or Language Assurance validation.

Publication-Ready Content

Final-ready copy where scope includes review, revision, and final polish.

9. Built For Section

Eyebrow

BUILT FOR

Headline

For teams creating Spanish experiences that users can trust.

Audience cards

Product Teams

Localize UI copy, onboarding, forms, errors, notifications, and product flows.

Marketing & Growth Teams

Adapt landing pages, campaigns, email flows, CTAs, and conversion copy.

Localization Teams

Improve Spanish quality, consistency, terminology, regional fit, and review workflows.

CX & Support Teams

Localize help centers, macros, support replies, chatbot scripts, and customer communication.

EdTech Teams

Adapt lessons, quizzes, scripts, explanations, assessments, and learning experiences.

AI Teams

Prepare Spanish content, prompts, examples, help materials, or user-facing copy that supports AI product experiences.

10. Pricing Section

Eyebrow

STARTING POINTS

Headline

Start with the Spanish experience your team needs now.

Body copy

Localization & Adaptation engagements are scoped based on content type, volume, product context, audience, Spanish variant, level of adaptation, complexity, and timeline.

Pricing cards

Website & Landing Page Localization

From \$2,500

Create or improve Spanish web pages, landing pages, service pages, FAQs, and conversion copy.

Product UI & UX Copy Localization

From \$3,000

Adapt product interfaces, onboarding, microcopy, forms, errors, and flows for Spanish-speaking users.

Marketing Localization & Transcreation

From \$2,500

Adapt campaigns, email flows, ads, launch messaging, sales content, and product marketing copy.

Help Center & Documentation Localization

From \$3,000

Localize support articles, FAQs, product documentation, how-to guides, and user education content.

EdTech & Learning Content Localization

From \$4,000

Adapt lessons, quizzes, scripts, learner feedback, assessments, and educational content.

Localization Review & Repair

From \$2,500

Improve existing Spanish translations for clarity, naturalness, consistency, regional fit, and publication readiness.

Pricing note

Final pricing is confirmed after a short diagnostic call and scope review. Pricing depends on volume, complexity, timeline, file format, level of adaptation, and whether in-context review or final QA is included.

11. FAQ Section

Eyebrow

FAQ

Headline

Common questions about Localization & Adaptation.

Is this translation or localization?

It can include translation, but the goal is broader: to create Spanish content that works for the product, audience, context, and business goal.

Do you charge per word?

Most Xpandia engagements are scoped by project, not by word. Word count matters, but so do product context, UX complexity, adaptation level, audience, timeline, and QA needs.

Can you adapt existing translations?

Yes. Localization Review & Repair is designed for teams that already have Spanish translations but need them to feel more natural, consistent, audience-aware, or ready to publish.

Can you localize product UI strings?

Yes. We can localize and adapt UI strings, microcopy, onboarding, forms, error messages, tooltips, notifications, and product flows.

Can you support LatAm, US Hispanic, or Spain Spanish?

Yes. Engagements can be scoped for LatAm, US Hispanic, Spain, neutral Spanish, or specific regional markets.

Can you also validate the localized content before launch?

Yes. Localization & Adaptation can be followed by Language Assurance to validate readiness, consistency, UX friction, regional fit, and launch risk.

12. Final CTA Section**Eyebrow**

NEXT STEP

Headline

Build Spanish your audience can understand, trust, and act on.

Body copy

Book a diagnostic call to review your content, product surface, audience, Spanish variant, timeline, and business goal. We'll recommend the right Localization & Adaptation path: website localization, product UI localization, marketing adaptation, documentation localization, learning content localization, or localization review and repair.

Pricing callout

Localization & Adaptation engagements start from \$2,500.

Primary CTA

Book a diagnostic call

Secondary CTA

Request localization review

Footer

Usar el mismo footer del Home.

Nota para ProjectApp

Esta página debe sentirse **premium, flexible y practical**. No debe parecer una agencia de traducción por palabra. Visualmente conviene usar:

- before/after copy examples,
- UI copy snippets,
- annotated landing page sections,
- regional fit tags,
- “source → adapted Spanish” visual blocks,
- content journey map,
- examples of deliverables such as terminology notes, regional fit notes, and QA-ready assets.

La sección debe evitar cualquier tabla de “precio por palabra”. Xpandia debe vender **adaptación orientada a producto, audiencia y resultado**, no volumen de traducción.

Vista 5 = Applied Cultural Intelligence.

Esta página debe posicionar ACI como una línea estratégica, no como “training cultural” genérico. La idea central debe ser:

ACI helps teams read the invisible rules behind trust, communication, behavior, and market response.

La página debe vender que Xpandia ayuda a empresas globales a entender audiencias hispanohablantes, mejorar comunicación intercultural, evitar fricción cultural, preparar equipos y tomar mejores decisiones de producto, contenido, CX, marketing y expansión. Esto está alineado con cómo se posiciona Cultural Intelligence en el mercado.

Hero proof points

For global teams

Leadership, Product, Marketing, CX, Localization, People, and Operations.

For Hispanic audiences

US Hispanic, LatAm, Spanish-speaking markets, and multicultural contexts.

For better decisions

Messaging, product experience, CX, communication, training, and market readiness.

2. Positioning Section

Eyebrow

WHY APPLIED CULTURAL INTELLIGENCE

Headline

Culture is the hidden operating system behind global business.

Body copy

Every market, team, and audience has invisible expectations: what builds trust, what feels respectful, what creates friction, what sounds credible, what feels too direct, what feels too vague, and what makes people act.

Applied Cultural Intelligence helps teams recognize those signals before they affect adoption, collaboration, conversion, customer experience, or market growth.

For Xpandia, ACI is not an abstract theory. It is a practical lens for improving how companies communicate, localize, build, support, sell, train, and expand across Spanish-speaking and multicultural markets.

Supporting line

The goal is simple: help your team make decisions with cultural context, not assumptions.

3. What Applied Cultural Intelligence Covers

Eyebrow

WHAT WE HELP YOU UNDERSTAND

Headline

The cultural signals that shape trust, behavior, and business outcomes.

Intro copy

Applied Cultural Intelligence helps teams understand the audience behind the language and the cultural context behind the decision.

Coverage cards

Trust signals

What makes your product, message, support experience, or brand feel credible, respectful, and safe for the audience.

Communication style

How directness, formality, tone, context, emotion, and relationship-building shape the way people interpret messages.

Decision-making

How users, customers, partners, and teams evaluate risk, authority, timing, certainty, and next steps.

Cultural red lines

The words, assumptions, visuals, examples, messages, or behaviors that may create friction, mistrust, confusion, or rejection.

Market and audience fit

How well your product, message, content, or experience fits Hispanic, LatAm, US Hispanic, Spanish-speaking, or multicultural audiences.

Cross-cultural teamwork

How global teams communicate, collaborate, give feedback, escalate issues, and align decisions across cultures.

4. When to Use Applied Cultural Intelligence

Eyebrow

WHEN TO USE IT

Headline

Use ACI when language is correct, but the connection is not guaranteed.

Bullets

- Your Spanish content is accurate, but does not fully connect with the audience.
 - Your messaging misses trust signals, tone, context, or cultural expectations.
 - Your team is entering Hispanic, LatAm, US Hispanic, or Spanish-speaking markets.
 - Your product, marketing, CX, or localization decisions need stronger cultural context.
 - Your global team needs to improve communication, collaboration, feedback, and decision-making across cultures.
 - Your company needs a talk, briefing, or workshop to build Cultural Intelligence before scaling into new markets.
 - Your team wants to identify cultural friction before it affects adoption, conversion, trust, or customer relationships.
-

5. Core ACI Criteria

Eyebrow

ACI CRITERIA

Headline

The signals behind communication your audience can trust.

Intro copy

Each ACI engagement is scoped around your audience, market, business goal, team context, and level of cultural complexity. Depending on the project, we evaluate or train around the criteria that matter most.

Criteria cards

Audience expectations

Does your product, message, or experience reflect what the audience values, expects, and needs to trust?

Trust and credibility

Does the communication build confidence, authority, warmth, clarity, and legitimacy with the intended audience?

Tone and relationship

Does the tone respect the audience's expectations around formality, closeness, authority, empathy, and professionalism?

Cultural context

Does the content account for social, regional, historical, behavioral, and market-specific context?

Communication style

Does the message align with how the audience gives, receives, interprets, and responds to information?

Decision behavior

Does the experience support how the audience evaluates risk, urgency, value, certainty, and next steps?

Cultural friction

Where could the experience create misunderstanding, hesitation, mistrust, discomfort, or unnecessary resistance?

Market readiness

Is the team culturally prepared to launch, communicate, support, sell, or operate in the target market?

Team mindset

Does the team have the awareness, language, and practical tools to work better across cultural contexts?

Growth alignment

Does the cultural strategy support product adoption, customer trust, team productivity, and market expansion?

6. Core Engagements**Eyebrow****CORE ENGAGEMENTS****Headline**

Talks, audits, workshops, and advisory for teams working across cultures.

Intro copy

Start with a focused ACI talk, audit, or briefing, then scale into workshops, go-to-market advisory, audience strategy, or ongoing cultural guidance.

Engagement 1

Cultural Intelligence Talks

Tagline

Read the invisible rules of global business.

Best for

Leadership, Product, Marketing, CX, Localization, People, and Global Operations teams working across cultures, markets, languages, or international teams.

Outcome

Help your team understand how Cultural Intelligence can improve collaboration, reduce friction, strengthen trust, and support better business decisions across cultures.

Overview

Culture is the hidden operating system behind global business. It shapes how people build trust, read timing, respond to hierarchy, give feedback, handle risk, make decisions, and interpret what is said — and what is left unsaid.

Xpandia Talks help leaders and teams decode those invisible rules, so they can communicate more effectively, reduce costly friction, and build stronger relationships across markets, languages, and audiences.

Talk themes

- Cultural Intelligence (CQ) for global business.
- The invisible protocols behind trust and communication.
- Cultural red lines and how to avoid crossing them.
- How culture shapes feedback, hierarchy, time, and decision-making.
- Culturalization for products, content, and customer experience.
- Hispanic and Spanish-speaking audience expectations.
- Mindset shifts for more productive global teams.

Talk deliverables

- ✓ 45–60 minute live talk or executive briefing.
- ✓ Pre-call to understand audience and business context.

- ✓ Practical CQ framework.
- ✓ Real business examples tailored to the audience.
- ✓ Optional Q&A.
- ✓ One-page summary or team checklist.
- ✓ Recommended next steps for workshop, audit, or advisory engagement.

Engagement starts at

Talks from \$1,500

Executive briefings from \$2,500

Timeline

Single session

CTA

Book a CQ Talk

Engagement 2

Hispanic Audience Messaging Review

Tagline

Make your message land with the audience you need to reach.

Best for

Marketing, Growth, Product Marketing, CX, Localization, and leadership teams adapting messages for Hispanic, LatAm, US Hispanic, or Spanish-speaking audiences.

Outcome

Identify where messaging can become clearer, more credible, more culturally aligned, and more persuasive for the intended audience.

Review deliverables

- ✓ Messaging review.
- ✓ Audience fit findings.
- ✓ Trust signal analysis.
- ✓ Tone and context recommendations.
- ✓ Cultural friction notes.
- ✓ Suggested rewrites or message directions.

- ✓ Executive summary.

Engagement starts at

From \$3,500

Timeline

7–10 business days

CTA

Request Messaging Review

Engagement 3

Spanish Market Fit Audit

Tagline

Understand how ready your product or message is for Spanish-speaking markets.

Best for

Teams entering, expanding, or improving their presence in Hispanic, LatAm, US Hispanic, Spain, or Spanish-speaking markets.

Outcome

Evaluate audience fit, cultural friction, communication risks, trust signals, and market readiness before launch, relaunch, or expansion.

Audit deliverables

- ✓ Market and audience fit findings.
- ✓ Cultural friction map.
- ✓ Trust and messaging analysis.
- ✓ Regional fit recommendations.
- ✓ Product/content/CX observations.
- ✓ Prioritized recommendations.
- ✓ Readiness summary.

Engagement starts at

From \$4,500

Timeline

10–15 business days

CTA

Request Market Fit Audit

Engagement 4

Culturalization Audit

Tagline

Adapt the experience, not just the language.

Best for

Product, Content, Marketing, EdTech, CX, and Localization teams that need to evaluate whether their Spanish or Hispanic-facing experience is culturally aligned.

Outcome

Identify where content, product flows, examples, visuals, tone, assumptions, messages, or support experiences need cultural adaptation.

Audit deliverables

- ✓ Culturalization review.
- ✓ Audience expectation analysis.
- ✓ Cultural fit findings.
- ✓ Red line and friction notes.
- ✓ Adaptation recommendations.
- ✓ Examples of what to adjust and why.
- ✓ Executive readout.

Engagement starts at

From \$3,500

Timeline

7–15 business days

CTA

Request Culturalization Audit

Engagement 5

CQ / ACI Workshops

Tagline

Build the cultural intelligence your team needs to work and grow across markets.

Best for

Leadership, Product, Marketing, CX, Localization, People, and Operations teams that need practical training in cross-cultural communication, Hispanic audience readiness, or culturalization.

Outcome

Give your team a shared framework, vocabulary, and practical tools to understand cultural signals, reduce friction, and make better decisions across markets.

Workshop deliverables

- ✓ Custom 90-minute, half-day, or multi-session workshop.
- ✓ Pre-call to understand team context and business goal.
- ✓ Practical CQ / ACI framework.
- ✓ Real examples tailored to your audience or market.
- ✓ Team exercises or discussion prompts.
- ✓ One-page checklist or working guide.
- ✓ Recommended next steps.

Engagement starts at

From \$4,500

Timeline

Single session or half-day

Multi-session workshops scoped separately.

CTA

Engagement 6

Go-to-Market Cultural Advisory

Tagline

Make cultural context part of your growth strategy.

Best for

Leadership, Product, Marketing, Growth, CX, and Localization teams planning Spanish-speaking market entry, Hispanic audience strategy, or multicultural expansion.

Outcome

Support better market decisions by integrating cultural insight into messaging, product positioning, customer experience, communication, and rollout strategy.

Advisory deliverables

- ✓ Strategic advisory sessions.
- ✓ Audience and market context.
- ✓ Cultural risk and opportunity analysis.
- ✓ Messaging and positioning guidance.
- ✓ Product/CX recommendations.
- ✓ Prioritized action plan.
- ✓ Follow-up guidance.

Advisory starts at

From \$3,000/month

Timeline

Monthly engagement

Recommended minimum: **3 months**

7. Methodology Section

Eyebrow

METHODOLOGY

Headline

A practical path from cultural uncertainty to better decisions.

Intro copy

Every Applied Cultural Intelligence engagement follows a structured process designed to turn cultural insight into action.

Step 1

Define the audience

We clarify your audience, market, team context, product surface, communication challenge, business goal, and cultural complexity.

Step 2

Decode the signals

We examine the cultural expectations, trust drivers, communication patterns, decision behaviors, and possible friction points shaping the situation.

Step 3

Translate insight into action

We turn cultural analysis into practical recommendations your team can use across product, content, marketing, CX, leadership, or go-to-market decisions.

Step 4

Build team readiness

Through talks, briefings, workshops, or advisory, we help teams develop the language, mindset, and tools to work more effectively across cultures.

Step 5

Recommend the next move

We identify the right path forward: adapt messaging, run a culturalization audit, train the team, refine go-to-market strategy, or move into ongoing advisory.

8. Deliverables Section

Eyebrow

THE DELIVERABLES

Headline

Cultural insight that your team can turn into better decisions.

Body copy

Applied Cultural Intelligence turns cultural complexity into clear findings, practical guidance, and business-ready recommendations.

Deliverable cards

Cultural Insight Report

A focused summary of the cultural patterns, expectations, and signals that matter for your audience or team.

Audience-Specific Recommendations

Practical guidance tailored to Hispanic, LatAm, US Hispanic, Spanish-speaking, or multicultural audiences.

Cultural Friction Map

A structured view of where misunderstandings, hesitation, mistrust, or resistance may appear.

Messaging Guidance

Recommendations to improve tone, trust signals, clarity, context, and audience connection.

Market Fit Findings

Insights on whether your product, content, message, or experience is aligned with the expectations of the target market.

CQ Framework

A practical model your team can use to understand cultural difference, communication styles, and audience behavior.

Workshop Materials

Slides, exercises, checklists, examples, or working guides tailored to the team or audience.

Action Roadmap

A prioritized plan for product, marketing, CX, localization, leadership, or go-to-market next steps.

9. Built For Section

Eyebrow

BUILT FOR

Headline

For teams making decisions across cultures.

Audience cards

Leadership Teams

Build cultural intelligence for better communication, decision-making, and global team alignment.

Product Teams

Understand how cultural context affects product experience, usability, trust, adoption, and user behavior.

Marketing & Growth Teams

Adapt messaging, campaigns, positioning, and conversion paths for Hispanic and Spanish-speaking audiences.

CX & Support Teams

Improve customer communication, escalation language, empathy, trust, and support experiences across cultures.

Localization Teams

Move beyond language accuracy into cultural fit, regional relevance, and audience readiness.

People & Global Operations Teams

Train distributed teams to communicate, collaborate, give feedback, and work across cultural contexts.

EdTech Teams

Adapt learning experiences, examples, feedback, and educational content for culturally diverse learners.

AI Teams

Understand cultural context behind AI outputs, user expectations, trust, tone, and risk in Spanish-speaking experiences.

10. Pricing Section

Eyebrow

STARTING POINTS

Headline

Start with the cultural insight your team needs now.

Body copy

Applied Cultural Intelligence engagements are scoped based on audience, market, team size, format, level of customization, cultural complexity, and business goal.

Pricing cards

Cultural Intelligence Talks

From \$1,500

Introduce leaders and teams to the invisible rules behind trust, communication, decision-making, and global business growth.

Executive Briefings

From \$2,500

A strategic session for leadership or cross-functional teams that need cultural insight tied to a specific audience, market, or business challenge.

ACI Audits

From \$3,500

Evaluate messaging, audience fit, culturalization, friction points, and readiness for Hispanic or Spanish-speaking audiences.

Spanish Market Fit Audit

From \$4,500

Assess market readiness, trust signals, cultural fit, communication risks, and audience alignment before launch or expansion.

Custom Workshops

From \$4,500

Train teams with practical Cultural Intelligence frameworks, examples, exercises, and recommendations tailored to their work.

Strategic Advisory

From \$3,000/month

Ongoing cultural guidance for teams entering, growing, or operating across Hispanic, Spanish-speaking, or multicultural markets.

Pricing note

Final pricing is confirmed after a short diagnostic call and scope review. Pricing depends on format, audience size, customization, business context, preparation, and deliverables.

11. FAQ Section

Eyebrow

FAQ

Headline

Common questions about Applied Cultural Intelligence.

Is ACI the same as cultural training?

It can include training, but Applied Cultural Intelligence is broader. It helps teams apply cultural insight to product, messaging, CX, localization, leadership, communication, and go-to-market decisions.

Is this only for Spanish-speaking audiences?

No. Xpandia's strongest focus is Hispanic and Spanish-speaking audiences, but the ACI framework also supports global teams working across cultures, markets, and languages.

Do we need this if our Spanish is already correct?

Yes. Correct Spanish can still miss cultural expectations, trust signals, tone, context, or audience fit. ACI helps determine whether the experience connects, not only whether it is linguistically accurate.

Can this help leadership teams?

Yes. ACI talks and executive briefings are designed to help leaders understand how culture shapes trust, communication, decision-making, feedback, hierarchy, risk, and global collaboration.

Can this support product or marketing decisions?

Yes. ACI can inform messaging, product flows, CX, onboarding, campaigns, go-to-market strategy, audience fit, and market readiness.

Can this be combined with Localization or Language Assurance?

Yes. ACI can guide localization before content is created, support cultural adaptation during localization, or complement Language Assurance when a Spanish experience needs cultural readiness evaluation.

12. Final CTA Section

Eyebrow

NEXT STEP

Headline

See the cultural signals your team may be missing.

Body copy

Book a diagnostic call to discuss your audience, market, product, team context, and business goal. We'll recommend the right Applied Cultural Intelligence path: a CQ talk, executive briefing, ACI audit, culturalization review, workshop, or strategic advisory engagement.

Pricing callout

Applied Cultural Intelligence engagements start from \$1,500.

Primary CTA

Book a diagnostic call

Secondary CTA

Book a CQ talk

Footer

Usar el mismo footer del Home.

Nota para ProjectApp

Esta página debe sentirse **estratégica, ejecutiva y humana**, no académica. Visualmente puede usar:

- mapa de señales culturales,
- “visible / invisible” framework,
- tarjetas de trust signals,
- diagramas de audience expectations,
- secciones de “what is said / what is left unsaid”,
- ejemplos de cultural red lines,
- workflow de “Decode → Align → Act”.

La página debe dejar claro que ACI no es solo capacitación: es una capacidad de negocio para ayudar a equipos globales a comunicar mejor, reducir fricción, entender audiencias y tomar mejores decisiones.

Vista 6 = About / Contact.

Esta vista debe cerrar confianza. Como Xpandia es una firma nueva o en proceso de posicionamiento, esta página no debe ser una biografía larga ni una página corporativa genérica. Debe responder tres preguntas del comprador:

Who is behind this?

Why should I trust them with Spanish quality, localization, and cultural intelligence?

What happens if I contact them?

Para B2B, esto importa mucho. Los usuarios esperan que las secciones “About Us” sean claras, auténticas y transparentes, y que las páginas de contacto incluyan formas directas de comunicación, no solo formularios o automatizaciones. También los compradores B2B necesitan completar tareas como comparar proveedores, compartir opciones internamente, crear shortlists y solicitar información, así que esta vista debe facilitar confianza y contacto directo.

VISTA 6 — ABOUT / CONTACT

Suggested URL

/about-contact

También se podrían separar más adelante en:

/about

/contact

Pero para lanzamiento inicial, se recomienda una sola vista **About / Contact**. Es más simple, más directa y evita una página “About” demasiado ligera.

2. Company Positioning Section

Eyebrow

WHO WE ARE

Headline

A boutique firm for Spanish quality, localization, and cultural intelligence.

Body copy

Xpandia was created for companies that need more than translation. We support teams building products, content, AI experiences, support journeys, campaigns, and market strategies for Spanish-speaking users.

Our work sits at the intersection of language, culture, product, and business judgment. We help teams understand what works in Spanish, what creates friction, what needs adaptation, and what is ready for real users.

Supporting line

Xpandia gives teams the expert judgment and structured guidance they need to move from assumptions to confident decisions.

3. What Makes Xpandia Different

Eyebrow

WHY XPANDIA

Headline

Spanish quality needs more than a fluent speaker.

Intro copy

Companies often rely on bilingual employees, vendors, internal reviewers, or automated outputs to judge Spanish quality. Those inputs can help, but they do not always provide the structured evaluation, cultural judgment, product context, or executive-ready evidence teams need.

Xpandia brings together the capabilities required to evaluate and improve Spanish experiences across real business contexts.

Differentiator cards

Senior Spanish judgment

Expert review grounded in language quality, meaning, clarity, tone, terminology, naturalness, and audience fit.

Localization and product context

Spanish evaluated or adapted inside real product, UX, content, support, marketing, and learning environments.

Applied Cultural Intelligence

Cultural insight that helps teams understand trust signals, audience expectations, communication style, and market fit.

AI and output evaluation

Structured review of AI-generated Spanish outputs, chatbot responses, tutors, copilots, agents, and support flows.

Decision-ready evidence

Scorecards, issue taxonomies, severity ratings, annotated examples, recommendations, and executive readouts.

Practical business focus

Recommendations designed for Product, AI, Localization, CX, Support, Marketing, EdTech, and leadership teams.

4. Founder / Leadership Section

Eyebrow

FOUNDER-LED EXPERTISE

Headline

Led by senior expertise in language, localization, culture, and business communication.

Body copy

Xpandia is founder-led and built around a practical belief: Spanish quality is not only a language issue. It is a product, trust, customer experience, and market-readiness issue.

Our work combines linguistic precision, localization experience, cultural intelligence, English-Spanish business communication, QA thinking, and the ability to translate findings into clear recommendations for global teams.

Founder foto placeholder

Nestor Solano

Founder, Xpandia Applied Cultural Intelligence SAS

Founder bio

Nestor helps global companies evaluate, localize, and culturally adapt content and experiences for the audiences they serve. His work combines 20+ years of translation expertise, language QA, localization project management, Applied Cultural Intelligence, and business communication across English, Spanish and Portuguese.

Through Xpandia, he advises teams that need to understand whether their Spanish content, AI outputs, product flows, support journeys, or market messages are clear, natural, trustworthy, culturally appropriate, and ready to ship to Spanish-speaking markets and audiences.

CX & Support Teams

Improve Spanish help content, support macros, chatbot flows, escalation language, and customer communication.

EdTech Teams

Adapt and validate Spanish learning experiences, explanations, assessments, feedback, and instructional content.

Marketing & Growth Teams

Adapt messaging, landing pages, campaigns, CTAs, and conversion copy for Hispanic and Spanish-speaking audiences.

Leadership & Global Teams

Build Cultural Intelligence for better communication, collaboration, trust, and market decisions.

7. How We Work

Eyebrow

HOW WE WORK

Headline

Focused, practical, and designed for teams that need decisions.

Step 1

Understand the context

We clarify your product, audience, Spanish variant, business goal, timeline, content type, and current challenge.

Step 2

Evaluate or adapt

We apply the right mix of Spanish expertise, localization judgment, cultural intelligence, QA criteria, and product awareness.

Step 3

Deliver clear evidence

You receive findings, recommendations, adapted assets, scorecards, issue logs, frameworks, or training materials your team can act on.

Step 4

Recommend the next move

We help your team decide whether to ship, fix, localize, adapt, train, govern, or scale.
