SEO Title: Xpandia | Spanish-English Language Assurance & Applied Cultural Intelligence

Meta Description: Xpandia helps AI, SaaS, EdTech, Product, Localization, CX, and Marketing teams validate, improve, and culturally adapt high-impact Spanish **and English** experiences through expert human review, quality evidence, and cultural insight.

Hero

Eyebrow: SPANISH EXPERTISE · LANGUAGE ASSURANCE · CULTURAL INTELLIGENCE

H1: Spanish that works for real users.

Subheadline: Xpandia helps AI, SaaS, EdTech, and product teams validate, improve, and culturally adapt their digital experiences for English and Spanish-speaking audiences.

Primary CTA (Updated): Talk to an Expert

Secondary CTA: Explore services

Proof bar

Item 1: 20+ years Global localization and language quality experience.

Item 2: Spanish & English focus LatAm, Spain, US and regional variants.

Item 3: Built for AI, Product, Localization, CX, Marketing, and EdTech teams.

Item 4: Regions US · Canada · Europe · LatAm

Why Xpandia

Eyebrow: WHY XPANDIA

Headline: Language quality is product quality.

Body copy: AI and automated translation can get Spanish most of the way there. But “mostly accurate” is not always enough when language affects trust, conversion, customer experience, or product adoption. Xpandia operates in that last mile between understandable Spanish and Spanish that is ready for real users. We help teams validate, improve, and deliver Spanish experiences that are accurate, clear, natural, culturally aware, and aligned with the way users think, decide, and act. For companies where Spanish quality directly affects UX, CX, trust, and revenue, Xpandia turns expert human judgment into the evidence, recommendations, and improvements needed to move from “good enough” to ready.

Callout: Validate. Adapt. Understand. The three ways Xpandia makes Spanish work in the real world.

Services overview

Eyebrow: SERVICES

Headline: **Identify** the problem your team needs to solve.

Intro copy: Xpandia helps teams validate the quality of existing experiences, improve what needs attention, and understand the target audience behind the language.

Service Card 1

Number/Title: 01 / VALIDATE Language Assurance

Tagline: Validate your Spanish **and English** before your users do.

Description: Structured audits and QA sprints for AI outputs, product flows, support content, launch readiness, and ongoing Spanish quality decisions.

Best for: Teams already operating in Spanish and English or preparing to launch with AI outputs, localized content, product experiences, or customer journeys and need to know whether they are accurate, natural, consistent, culturally appropriate, and ready for users.

Core services: - AI Quality Audit Sprint - Launch Readiness Audit - Quality Advisory

What you get: Decision-ready evidence: quality scorecards, issue taxonomies, severity ratings, prioritized fixes, and clear recommendations to help your team improve language quality and make the experience user-ready.

CTA: Explore Language Assurance

Service Card 2

Number/Title: 02 / ADAPT Language Experience Repair & Adaptation

Tagline: Turn just-translated content into user-ready experiences.

Description: Expert repair, custom adaptation, and localization of high-impact Spanish/English content, AI or MT outputs, product copy, support content, messaging, and customer-facing experiences.

Best for: Teams with existing Spanish content, AI-generated outputs, machine-translated copy, product copy, support materials, or marketing assets that need to feel clearer, more natural, more consistent, and better aligned with the audience.

Core services: - Language Experience Repair - Product & Content Adaptation

What you get: Improved Spanish/English copy, AI/MT output repair, rewrite recommendations, terminology guidance, tone notes, regional fit guidance, and QA-ready or publication-ready assets.

CTA: Explore Adaptation

Service Card 3

Number/Title: 03 / UNDERSTAND Applied Cultural Intelligence

Tagline: Make better decisions with cultural context.

Description: Talks, briefings, workshops, and advisory that help leaders and global teams strengthen Cultural Intelligence, understand English and Spanish-speaking audiences, avoid cultural friction, and make better product, market, communication, and people decisions.

Best for: Leadership, Product, Marketing, CX, People, Localization, and Global Operations teams that need to work across cultures, enter new markets, improve team effectiveness, or understand the invisible norms that shape trust, behavior, and business outcomes.

Core services: ACI Talk / Executive Briefing | CQ & ACI Workshops | Hispanic Audience & Messaging Review | Cultural Fit Advisory

What you get: Practical CQ frameworks, culturalization guidance, audience-specific insights, cultural friction analysis, messaging guidance, executive briefings, team workshops, and action-ready next steps.

CTA: Explore Applied Cultural Intelligence

What you get

Eyebrow: WHAT YOU GET

Headline: Evidence your team can act on.

Intro copy: Every Xpandia engagement turns expert judgment into practical evidence: scorecards, findings, examples, recommendations, and decision-ready guidance.

Card 1 — Quality Scorecard: Measurable scoring across the criteria that matter for your use case: accuracy, clarity, naturalness, tone, terminology, regional fit, cultural fit, UX friction, readiness, and risk.

Card 2 — Issue Taxonomy: A structured view of what is affecting quality, where it happens, how severe it is, and what your team should fix first.

Card 3 — Remediation Guidance: Practical recommendations, rewrites, examples, terminology notes, and standards to help your team improve Spanish quality without slowing down delivery.

Card 4 (última) — Executive Readout: A concise summary for Product, AI, Localization, CX, Marketing, or leadership teams with risks, opportunities, and recommended next steps.

***NOTE FOR PROJECTAPP:** Corregir las cifras de texto para evitar que el texto en la vista de celda se rompa en el diseño.*

Method

Eyebrow: METHODOLOGY

Headline: The method behind Spanish that works

Intro copy: Every engagement is designed and follows a rigorous process to help your team understand what is working, what needs attention, why it matters, and what to do next.

***NOTE FOR PROJECTAPP:** Las secciones 01 a 04 deben presentar una transición/movimiento animado en orden cronológico.*

01 Define: We clarify your product, audience, Spanish variant, content surface, business goal, timeline, and what “good” needs to mean for your team.

02 Evaluate: We review language, meaning, tone, terminology, clarity, cultural fit, UX friction, audience expectations, and quality risks using expert human judgment and structured criteria.

03 Prioritize: We separate critical issues from quick wins and organize findings by severity, business impact, and implementation effort.

04 Improve: We deliver recommendations, rewrites, standards, scorecards, examples, and next steps your team can act on.

Who We Work With

Eyebrow: WHO WE WORK WITH

Headline: Teams building products and experiences in Spanish and English.

AI & ML Product Teams: Validate Spanish and English outputs from chatbots, tutors, copilots, agents, and generative AI experiences before users rely on them.

SaaS & Product Teams: Improve Spanish and English product flows, onboarding, UI copy, forms, errors, and launch readiness.

Localization Teams: Strengthen Spanish and English quality, reviewer alignment, terminology, vendor oversight, and sign-off decisions.

CX & Support Teams: Improve Spanish and English help content, support macros, chatbot responses, and customer-facing communication.

Marketing & Growth Teams: Adapt messaging, landing pages, campaigns, CTAs, and conversion copy for English and Spanish-speaking audiences.

EdTech Teams: Make Spanish and English learning experiences clear, natural, culturally relevant, and pedagogically effective.

AI Models & Platforms

Eyebrow: AI ECOSYSTEM

Headline: AI models and platforms we validate and optimize.

Intro copy: We do more than just review text; we deeply understand the automation, content generation, and low-code development environments where you build your products. We ensure the outputs of your agents, prompts, and integrated workflows are seamless, natural, and conversion-ready.

Especificaciones Técnicas para el Componente de Carrusel horizontal:

- ***Requisitos de Assets:*** Renderizar cada logo como un asset independiente utilizando una etiqueta `<img>` limpia y separada o un contenedor de icono dentro de un ciclo (loop). No combinar los logos en una sola imagen ancha.
- ***Formato:*** Proporcionar los logos en un diseño vectorial uniforme con relación de aspecto 1:1 (se prefiere formato SVG, o en su defecto PNG transparente de alta resolución) para que no se deformen en versión mobile/celular.
- ***Estilos (CSS):*** Aplicar cajas de delimitación (bounding boxes) idénticas para todos los logos (por ejemplo, `max-height: 48px` o `54px`) con una alineación flex centrada (`display: flex; align-items: center; justify-content: center;`). Implementar un diseño limpio con los colores de la marca o un filtro sutil de escala de grises que pase a color completo al hacer hover (`filter: grayscale(100%)` a `filter: grayscale(0%)` con un `transition: ease 0.3s`) sobre un fondo limpio (`#FFFFFF` o `#F8FBFD`) para hacer match con la estética tecnológica premium del sitio.

Final CTA Section

Eyebrow: NEXT STEP

Headline: Know where your Spanish stands — and what to do next.

Body copy: In a focused diagnostic call, we review your Spanish surface, audience, product context, timeline, and business goal, and then, if applicable, we recommend the right path forward: an audit, AI QA sprint, Spanish repair engagement, ACI talk, messaging review, or quality advisory path.

Primary CTA (Updated): Talk to an Expert

NOTE FOR PROJECTAPP: ELIMINATE THE SECONDARY CTA ('Explore services') from this section completely to focus conversion path.

VISTA 2 — SERVICES

SEO

SEO Title: Services | Spanish and English Language Assurance, Adaptation & Cultural Intelligence | Xpandia

Meta Description: Explore Xpandia services for Spanish and English Language Assurance, Spanish and English Experience Repair, and Applied Cultural Intelligence for AI, SaaS, EdTech, Product, CX, Marketing, and Localization teams.

Hero

Eyebrow: SERVICES

H1: The Spanish expertise your product needs.

Subheadline: Xpandia helps teams validate, improve, and culturally adapt high-impact Spanish experiences across AI outputs, product flows, support content, marketing, and customer journeys.

Primary CTA (Updated): Talk to an Expert

Secondary CTA: Request an audit

Supporting line: Built for AI, SaaS, EdTech, Product, Localization, CX, and Marketing teams serving English and Spanish-speaking audiences.

Choose the right path

Eyebrow: CHOOSE THE RIGHT PATH

Headline: What does your team need to solve?

Intro copy: Start with the outcome your team needs. Xpandia structures each engagement around a clear business question: is your Spanish ready, does it need to be repaired or adapted, or does your team need deeper cultural insight?

Decision Card 1

Title: Need to know if your Spanish is ready?

Selection: Choose Language Assurance

Description: For teams that already have Spanish AI outputs, product flows, support content, or localized experiences and need expert validation before launch, scale, or release.

Best when you need to: - Evaluate Spanish AI outputs. - Audit a product or customer journey in Spanish. - Identify quality risks before deployment. -

Prioritize fixes by severity and business impact. - Create standards for ongoing Spanish quality.

CTA: Explore Language Assurance

Decision Card 2

Title: Need to repair or improve Spanish content?

Selection: Choose Language Experience Repair & Adaptation

Description: For teams with Spanish content, product copy, support content, marketing, documentation, or customer-facing experiences that need to feel clearer, more natural, more consistent, and more audience-ready.

Best when you need to: - Improve existing Spanish and English content. - Repair translated, inconsistent, or underperforming language. - Adapt product, support, or marketing copy for real users. - Align terminology, tone, and regional Spanish. - Prepare Spanish assets for QA, launch, or publication.

CTA: Explore Repair & Adaptation

Decision Card 3

Title: Need to understand your audience beyond language?

Selection: Choose Applied Cultural Intelligence

Description: For teams that need cultural insight, messaging guidance, market readiness, training, and strategic direction to connect with English and Spanish-speaking audiences.

Best when you need to: - Understand cultural expectations and trust signals. - Improve messaging for Hispanic audiences. - Prepare teams for Spanish-speaking markets. - Train teams in Cultural Intelligence. - Identify cultural friction before it affects adoption or conversion. - Make better product, content, CX, and go-to-market decisions.

CTA: Explore Applied Cultural Intelligence

Core services Grid

Eyebrow: CORE SERVICES

Headline: Focused engagements designed to create momentum.

Intro copy: Start with a clear scope, expert human review, practical deliverables, and recommendations your team can act on quickly.

NOTE FOR PROJECTAPP: AJUSTE CTAs PARA LAS 6 TARJETAS DE SERVICIO A CONTINUACIÓN: Cambiar los botones de bloque principales por enlaces de texto integrados secundarios con una flecha al final (→) para evitar un desorden visual masivo y reducir la fatiga de decisión de conversión.

Service 1 — AI Quality Audit Sprint

Best for: Teams with AI outputs, chatbot responses, tutors, copilots, agents, or automated support flows operating in Spanish and English.

Outcome: Understand quality risks, scoring, issue patterns, and readiness before users rely on the experience.

Deliverables: Representative output review, QA rubric, Quality scorecard, Issue taxonomy, Severity ratings, Remediation guidance, Executive readout.

Starts at: From \$4,500 | Timeline: 10 business days

CTA Link Style (Updated): Request an AI QA Sprint →

Service 2 — Spanish Launch Readiness Audit

Best for: Teams launching or preparing a Spanish or English website, app, onboarding flow, support journey, AI experience, or customer-facing product surface.

Outcome: Identify what affects clarity, trust, UX, cultural fit, conversion, and readiness before launch or relaunch.

Deliverables: Journey review, Screenshots and annotations, Issue log, Quick wins, Prioritized remediation backlog, Readiness recommendation.

Starts at: From \$3,500 | Timeline: 10–12 business days

CTA Link Style (Updated): Request a Launch Readiness Audit →

Service 3 — Language Experience Repair

Best for: Teams with existing Spanish or English content that sounds translated, inconsistent, unclear, generic, too literal, or not ready for real users.

Outcome: Turn underperforming language into content that feels clear, natural, trustworthy, and aligned with your product, audience, and business goal.

Can include: Product copy, Website or landing page copy, Support content, Help center content, AI response patterns, Marketing copy, Terminology and tone fixes, Regional adaptation.

Deliverables: Revised Spanish/English copy, Rewrite recommendations, Terminology and tone notes, Before/after examples, Priority fixes, Implementation guidance.

Starts at: From \$2,500 | Timeline: 5–10 business days depending on scope

CTA Link Style (Updated): Request Spanish Experience Repair →

Service 4 — ACI Talk / Executive Briefing

Best for: Leadership, Product, Marketing, CX, Localization, People, and Global Operations teams working across cultures, markets, languages, or international teams.

Outcome: Help your team understand how the Cultural Intelligence (CQ) engine helps build more productive teams that drive trust, positive feedback, market readiness, audience expectations, and increased ROI.

Deliverables: 45–60 minute live talk or executive briefing, Pre-call context review, Practical CQ / ACI framework, Real business examples, Optional Q&A, One-page team checklist, Recommended next steps.

Starts at: Talks from \$1,500 / Executive briefings from \$2,500 | Timeline: Single session

CTA Link Style (Updated): Book an ACI Talk →

Service 5 — Hispanic Audience & Messaging Review

Best for: Marketing, Growth, Product Marketing, CX, Localization, and leadership teams adapting messages for Hispanic, LatAm, US Hispanic, or Spanish-speaking audiences.

Outcome: Identify whether your message is clear, credible, culturally aligned, persuasive, and built around the trust signals your audience needs.

Deliverables: Messaging review, Audience fit findings, Trust signal analysis, Tone and context recommendations, Cultural friction notes, Suggested rewrites, Executive summary.

Starts at: From \$3,500 | Timeline: 7–10 business days

CTA Link Style (Updated): Request Messaging Review →

Service 6 — Language Quality Advisory

Best for: Teams that need ongoing senior Spanish/English quality judgment, review workflows, QA standards, vendor/reviewer alignment, terminology guidance, or recurring quality decisions.

Outcome: Build a practical Spanish/English quality system your team can use to make better decisions, reduce review friction, and scale quality with confidence.

Deliverables/Includes: Monthly advisory sessions, Quality roadmap, Retesting, Sign-off guidance, Terminology and style standards, Vendor alignment, QA criteria, Lightweight governance, Decision support.

Starts at: From \$3,000/month | Timeline: Monthly engagement (Recommended min: 3 months)

CTA Link Style (Updated): Explore Language Quality Advisory →

How to choose

Eyebrow: HOW TO CHOOSE

Headline: The difference is simple: validate, repair, or understand.

Table Structure:

- If your team needs to: Know whether Spanish AI outputs, product flows, or support content are ready to ship -> Choose: Language Assurance -> Primary Outcome: Quality validation and readiness
- If your team needs to: Improve Spanish content that exists but does not feel natural, clear, or audience-ready -> Choose: Spanish Experience Repair & Adaptation -> Primary Outcome: Spanish content built for real users
- If your team needs to: Understand Hispanic/LatAm audiences, cultural expectations, trust, and market fit -> Choose: Applied Cultural Intelligence -> Primary Outcome: Better decisions for Spanish-speaking markets
- If your team needs to: Build repeatable standards and ongoing quality support -> Choose: Spanish Quality Advisory -> Primary Outcome: A scalable quality system

Supporting copy: Many teams start with an audit, then move into repair, retesting, sign-off, cultural insight, or ongoing advisory. Xpandia can support a focused need or help build a broader Spanish quality roadmap.

Engagement model

Eyebrow: HOW ENGAGEMENTS WORK

Headline: Clear scope. Expert review. Actionable output.

Step 1 — Scope the need: We define your audience, Spanish variant, product surface, content type, business objective, timeline, and expected outcome.

Step 2 — Review the experience: We evaluate or adapt the selected material using expert human judgment and the right mix of linguistic, cultural, UX, and product quality signals.

Step 3 — Deliver the evidence: You receive decision-ready findings your team can use immediately: scorecards, annotated examples, issue logs, severity ratings, prioritized recommendations, rewrites, standards, or training materials.

Step 4 — Decide the next move: We recommend the right next step: ship, fix, retest, localize, adapt, train, govern, or scale.

Final CTA Section

Eyebrow: NEXT STEP

Headline: Let's identify the right Spanish quality path for your team.

Body copy: Tell us what your team is building, launching, localizing, validating, or improving. We'll recommend the right engagement based on your product, audience, timeline, and business goal.

Primary CTA (Updated): Talk to an Expert

NOTE FOR PROJECTAPP: ELIMINATE THE SECONDARY CTA ('Request an AI QA Audit') from this closing section completely.

VISTA 3 — LANGUAGE ASSURANCE

SEO

SEO Title: Spanish/English Language Assurance for AI, Product & CX Teams | Xpandia

Meta Description: Xpandia helps AI, SaaS, EdTech, Product, Localization, and CX teams validate Spanish and English quality across AI outputs, product experiences, support content, and launch-ready journeys.

Suggested URL: /services/language-assurance

Hero

Eyebrow: LANGUAGE ASSURANCE

H1: Validate Spanish before your users do.

Subheadline: Xpandia helps AI, SaaS, EdTech, Product, Localization, and CX teams evaluate Spanish quality across AI outputs, product experiences, support content, and launch-ready journeys.

Supporting copy: We turn expert Spanish judgment into measurable findings your team can act on: scorecards, issue taxonomies, severity ratings, readiness recommendations, and remediation guidance.

Primary CTA: Request an AI QA Sprint

Secondary CTA (Updated): See our methodology

NOTE FOR PROJECTAPP: Se cambió de 'Book a diagnostic call' a un enlace 'See our methodology' configurado con desplazamiento suave (smooth-scroll) hacia abajo hasta el bloque de metodología, evitando la redundancia del gancho de contacto.

Proof points: AI outputs (Chatbots, copilots, tutors, agents) | Product readiness (UX copy, onboarding, forms) | Decision-ready evidence (Scorecards, issues taxonomy findings readout, risk analysis)

Why Language Assurance

Eyebrow: WHY LANGUAGE ASSURANCE

Headline: Spanish quality is too important to leave unmeasured.

Body copy: English and Spanish-speaking users experience your product through language: the answers your AI gives, the instructions your product provides, the support content they trust, and the messages that guide their decisions. When language quality is inconsistent, unnatural, culturally misaligned,

or hard to understand, teams lose clarity, trust, adoption, and confidence before they even know where the issue started. Language Assurance gives your team a structured way to evaluate what is working, what needs attention, how severe each issue is, and whether the experience is ready for real users.

Callout: The goal is simple: help your team know whether your Spanish/English is accurate, natural, trustworthy, culturally appropriate, and ready to ship.

What we evaluate

Eyebrow: WHAT WE EVALUATE

Headline: Language quality across every user-facing surface.

Intro copy: Language Assurance can be applied to any Spanish and English experience your users see, read, hear, follow, or rely on.

Cards content:

- AI-generated outputs: Chatbot responses, AI tutors, copilots, agents, support replies, generated explanations.
- Product experiences: Onboarding flows, UI copy, forms, empty states, error messages, notifications, tooltips.
- Support and CX content: Help center articles, support macros, chatbot flows, escalation language.
- Localization quality: Translated or localized experiences needing expert review, regional fit, or final sign-off.
- Launch readiness: Spanish and English product surfaces, AI experiences, or customer journeys validating before deployment.
- Marketing and conversion content: Landing pages, campaign copy, email flows, value propositions, conversion paths.

When to use it

Eyebrow: WHEN TO USE IT

Headline: Use Language Assurance when your Spanish or English quality needs a decision.

Bullet list:

- Your AI generates Spanish/English outputs, but your team needs to know if users can trust them.
- Your product is translated or localized, but you are unsure if it feels natural, clear, and ready.
- Your team is preparing a Spanish/English launch, relaunch, release, or market expansion.

- Your support, help center, or chatbot experience in Spanish/English needs quality validation.
- Your team relies on vendors, reviewers, or internal speakers without a clear QA framework.
- Your leadership team needs evidence, not opinions, before deciding what to fix or ship.

Core services

Eyebrow: CORE SERVICES

Headline: Focused audits and advisory for teams that need confidence before shipping Spanish experiences.

Service 1: AI Quality Audit Sprint [Details same as Vista 2] -> CTA: Request an AI QA Sprint

Service 2: Launch Readiness Audit [Details same as Vista 2] -> CTA: Request a Launch Readiness Audit

Service 3: Language Quality Advisory [Details same as Vista 2] -> CTA: Explore **Language** Quality Advisory

Additional modules

Eyebrow: CUSTOM MODULES

Headline: Add the level of assurance your project needs.

Body copy: Depending on scope, Language Assurance engagements can include conversational chatbot audits, AI output benchmarks, language sign-off, retesting, terminology checks, or lightweight governance support.

Module list: Chatbot & AI Output Audit | AI Output Benchmark | Language Sign-Off / LSO Review | Retest / Continuous Evaluation | Terminology & Style QA | Spanish/English Quality Governance Support

Methodology

Eyebrow: METHODOLOGY

Headline: A structured path from Spanish review to release confidence.

(Agregar movimiento secuencial de paso 1 a paso 5)

Step 1 — Scope the surface: We define your audience, Spanish variant, product surface, AI use case, content type, business objective, risk level, and timeline.

Step 2 — Evaluate quality: We review the selected material using expert Spanish/English judgment and structured criteria: accuracy, clarity, naturalness, tone, terminology, regional fit, cultural fit, UX friction, and readiness.

Step 3 — Score and classify: We organize findings by severity, impact, pattern, and implementation effort so your team can understand what matters most.

Step 4 — Deliver the evidence: You receive decision-ready findings your team can use immediately: scorecards, annotated examples, issue logs, severity ratings, prioritized recommendations, rewrites, standards, and executive readouts.

Step 5 — Decide the next move: We recommend the right path forward: ship, fix, retest, adapt, train, govern, or scale.

Final CTA Section

Eyebrow: NEXT STEP

Headline: Know if your Spanish is ready before users decide for you.

Body copy: Book a diagnostic call to review your Spanish/English surface, audience, use case, timeline, and business goal. We'll recommend the right Language Assurance path: diagnostic, AI QA sprint, launch readiness audit, retest, sign-off, or advisory.

Primary CTA (Updated): Talk to an Expert

NOTE FOR PROJECTAPP: ELIMINATE THE SECONDARY CTA ('Request an AI QA Sprint') from this closing section completely.

VISTA 4 — LANGUAGE EXPERIENCE REPAIR & ADAPTATION SEO

SEO Title: Language Experience Repair & Adaptation for Digital Products | Xpandia

Meta Description: Xpandia helps SaaS, AI, EdTech, Product, Marketing, CX, and Localization teams repair, improve, and adapt high-impact Spanish and English content, product copy, documentation, and customer-facing experiences.

Suggested URL: /services/localization-adaptation

Hero

Eyebrow: LANGUAGE EXPERIENCE REPAIR & ADAPTATION

H1: More than translated. Built for English and Spanish-speaking audiences.

Subheadline: Xpandia helps teams repair, improve, and adapt high-impact Spanish and English content, product experiences, documentation, and campaigns so they feel clear, natural, trustworthy, and ready for real users.

Supporting copy: We combine senior Spanish and English language expertise, localization judgment, UX awareness, and cultural adaptation to help your content work across the moments that matter: product use, onboarding, support, learning, marketing, and conversion.

Primary CTA: Request Experience Repair

Secondary CTA (Updated): See our methodology

***NOTE FOR PROJECTAPP:** Se cambió de 'Book a diagnostic call' al enlace de navegación 'See our con desplazamiento suave (*smooth-scroll*) hacia abajo hasta el bloque de metodología.*

Proof points:

Product-ready Spanish

UI copy, onboarding, forms, errors, flows, and user-facing product content.

Content that connects

Websites, campaigns, help centers, learning materials, and customer communication.

Audience-aware adaptation

LatAm, US Hispanic, Spain, neutral Spanish, or specific regional markets.

Positioning

Eyebrow: WHY REPAIR & ADAPTATION

Headline: Translation helps users read. Adaptation helps users trust, understand, and act.

Body copy: A Spanish or English version can be technically correct and still feel foreign, literal, inconsistent, or disconnected from the audience. That gap affects clarity, trust, UX, conversion, support, learning, and product adoption. Language Experience Repair & Adaptation closes that gap. We help teams improve Spanish and English experiences that respect the product context, the user journey, the audience, the market, and the business goal.

Callout: Our infrastructure is built exclusively for high-impact surfaces, where expert human judgment, deep context, and cultural adaptation are business-critical.

What we repair and adapt

Eyebrow: WHAT WE ADAPT

Headline: High-impact Spanish and English content across the user journey.

Intro copy: We focus on the language touchpoints your audience reads, follows, clicks, learns from, or uses to make a decision.

Cards content:

- Product and UX copy

Buttons, menus, onboarding, tooltips, notifications, forms, error messages.

- Websites and landing pages

Homepages, product pages, service pages, pricing pages, FAQs, lead-generation.

- Support and CX content

Help center articles, support macros, chatbot scripts, escalation language.

- Marketing and campaigns

Email campaigns, ads, launch messaging, sales content, value propositions.

- Learning and EdTech content

Lessons, scripts, quizzes, instructions, assessments, educational explanations.

- Terminology and tone

Preferred terms, consistency rules, tone guidance, style fixes, regional recommendations.

When to use it

Eyebrow: WHEN TO USE IT

Headline: Use it when Spanish/English exists, but does not yet feel made for the user.

Bullet list:

- Your Spanish/English content sounds literal, generic, inconsistent, or disconnected from the audience.
- Your product UI, help content, or marketing copy needs to feel natural and trustworthy.
- Your English-first product, website, content, or campaign needs an expert Spanish version or vice versa.
- Your Spanish/English experience needs regional adaptation for LatAm, US Hispanic, Spain, or a specific market.
- Your content needs to support conversion, clarity, trust, learning, or user action.
- Your audience understands the words, but the experience still does not feel built for them.

Core services

Eyebrow: CORE SERVICES

Headline: Repair, adapt, and prepare Spanish/English experiences for real users.

Service 1: Language Experience Repair [Details same as Vista 2] -> CTA: Request Language Experience Repair

Service 2: Product & Content Adaptation [Details same as Vista 2] -> CTA: Request Product & Content Adaptation

Methodology

Eyebrow: METHODOLOGY

(Agregar movimiento secuencial de paso 1 a paso 5)

Headline: A practical path from existing Spanish/English to audience-ready Spanish/English.

Step 1 — Understand the context: We clarify your audience, Spanish variant, product surface, content type, business goal, tone, terminology, and publication needs.

Step 2 — Repair or adapt the experience: We improve the selected content with attention to meaning, clarity, tone, terminology, regional fit, cultural fit, UX context, and user action.

Step 3 — Review in context: Where access is available, we review Spanish/English inside the product, website, document, flow, or layout so the copy works in the real experience.

Step 4 — Deliver usable Spanish assets: You receive adapted, QA-ready, or publication-ready Spanish/English copy, along with terminology guidance, regional fit notes, cultural rationale, and implementation comments.

Step 5 — Prepare for launch or QA: We recommend the right next step: publish, QA, sign off, repair further, expand, test, or move into Language Assurance for readiness validation.

Final CTA Section

Eyebrow: NEXT STEP

Headline: Build Spanish/English your audience can understand, trust, and act on.

Body copy: Book a diagnostic call to review your content, product surface, audience, Spanish variant, timeline, and business goal. We'll recommend the right path: repair, adaptation, QA, sign-off, or ongoing support.

Primary CTA (Updated): Talk to an Expert

NOTE FOR PROJECTAPP: ELIMINATE THE SECONDARY CTA ('Request Spanish Experience Repair') from this closing section completely.

VISTA 5 — APPLIED CULTURAL INTELLIGENCE

SEO

SEO Title: Applied Cultural Intelligence for Global Teams & Hispanic Audiences | Xpandia

Meta Description: Xpandia helps Product, Marketing, CX, Localization, Leadership, and Global Operations teams understand Hispanic and Spanish-speaking audiences, reduce cultural friction, and make better business decisions across markets.

Suggested URL: /services/applied-cultural-intelligence

Hero

Eyebrow: APPLIED CULTURAL INTELLIGENCE

H1: Make better decisions with cultural context.

Subheadline: Xpandia helps global teams understand Hispanic and Spanish-speaking audiences, decode cultural signals, improve cross-cultural communication, and make better product, content, marketing, CX, and go-to-market decisions.

Supporting copy: Culture shapes how people build trust, read timing, respond to hierarchy, give feedback, handle risk, make decisions, and interpret what is said — and what is left unsaid. Applied Cultural Intelligence turns those invisible signals into practical business insight your team can use.

Primary CTA (Updated): Talk to an Expert

***NOTE FOR PROJECTAPP:** Se cambió de 'Book an ACI Talk' a 'Talk to an Expert' para mantener el gancho consistente del ecosistema de contacto.*

Secondary CTA (Updated): See core services

***NOTE FOR PROJECTAPP:** Se cambió de 'Solicitar una revisión de mensajes' a un enlace de navegación 'See Core Services' configurado con desplazamiento suave (smooth-scroll) hacia abajo hasta la sección de Servicios Principales.*

Why ACI

Eyebrow: WHY APPLIED CULTURAL INTELLIGENCE

Headline: Culture is the hidden operating system behind global business.

Body copy: Every market, team, and audience has invisible expectations: what builds trust, what feels respectful, what creates friction, what sounds credible, what feels too direct, what feels too vague, and what makes people act. Applied Cultural Intelligence helps teams recognize those signals before they affect adoption, collaboration, conversion, customer experience, or market growth. For Xpandia, ACI is not abstract theory. It is a practical lens for improving how companies communicate, localize, build, support, sell, train, and expand across Spanish-speaking and multicultural markets.

Callout: The **ACI** goal is simple: help your team make decisions with cultural context, not assumptions.

What we help you understand

Eyebrow: WHAT WE HELP YOU UNDERSTAND

Headline: The cultural signals that shape trust, behavior, and business outcomes.

Items content:

- Trust signals: What makes your product, message, support experience, or brand feel credible, respectful, and safe for the audience.
- Communication style: How directness, formality, tone, context, emotion, and relationship-building shape the way people interpret messages.
- Decision-making: How users, customers, partners, and teams evaluate risk, authority, timing, certainty, and next steps.
- Cultural red lines: The words, assumptions, visuals, examples, messages, or behaviors that may create friction, mistrust, confusion, or rejection.
- Market and audience fit: How well your product, message, content, or experience fits English or Spanish-speaking audiences.
- Cross-cultural teamwork: How global teams communicate, collaborate, give feedback, escalate issues, and align decisions across cultures **to be more productive**.

When to use it

Eyebrow: WHEN TO USE IT

Headline: Use ACI when language is correct, but the connection is not guaranteed.

Bullet list:

- Your Spanish/English content is accurate, but does not fully connect with the audience.
- Your messaging misses trust signals, tone, context, or cultural expectations.
- Your team is entering LatAm, US Hispanic, English or Spanish-speaking markets.
- Your product, marketing, CX, or localization decisions need stronger cultural context.
- Your global team needs to improve communication, collaboration, feedback, and decision-making across cultures.
- Your company needs a talk, briefing, or workshop to build Cultural Intelligence before scaling into new markets.
- Your team wants to identify cultural friction before it affects adoption, conversion, trust, or customer relationships.

- when you want to safeguard your brand and prevent cultural friction with costly financial and reputational fallout.

Core services

Eyebrow: CORE SERVICES

Headline: Keynotes, cultural reviews, and strategic advisory for teams operating across cultures.

Service 1: ACI Talk / Executive Briefing [Details same as Vista 2] -> CTA: Book an ACI Talk

Service 2: Hispanic Audience & Messaging Review [Details same as Vista 2] -> CTA: Request Messaging Review

Service 3: Cultural Fit Advisory [Details same as Vista 2] -> Includes: Spanish market fit review, Culturalization audit, Regional fit strategy, Workshop, GTM guidance -> CTA: Explore Cultural Fit Advisory

Methodology

Eyebrow: METHODOLOGY

Headline: A practical path from cultural uncertainty to better decisions.

01 Define the audience: We clarify your audience, market, team context, product surface, communication challenge, business goal, and cultural complexity.

02 Decode the signals: We examine the cultural expectations, trust drivers, communication patterns, decision behaviors, and possible friction points shaping the situation.

03 Translate insight into action: We turn cultural analysis into practical recommendations your team can use across product, content, marketing, CX, leadership, or go-to-market decisions.

04 Build team readiness: Through talks, briefings, workshops, or advisory, we help teams develop the language, mindset, and tools to work more effectively across cultures.

05 Recommend the next move: We identify the right path forward: adapt messaging, run a cultural review, train the team, refine go-to-market strategy, or move into ongoing advisory.

Final CTA Section

Eyebrow: NEXT STEP

Headline: See the cultural signals your team may be missing.

Body copy: Book a diagnostic call to discuss your audience, market, product, team context, and business goal. We'll recommend the right Applied Cultural Intelligence path: an ACI talk, executive briefing, messaging review, cultural fit advisory, workshop, or strategic guidance.

Primary CTA (Updated): Talk to an Expert

NOTE FOR PROJECTAPP: ELIMINATE THE SECONDARY CTA ('Book an ACI Talk') from this closing section completely.

VISTA 6 — ABOUT

SEO

SEO Title: About Xpandia | Spanish and English Expertise, Language Assurance & Cultural Intelligence

Meta Description: Meet Xpandia, a boutique Spanish and English expertise firm helping AI, SaaS, EdTech, Product, Localization, CX, and Marketing teams validate, improve, and culturally adapt Spanish and English experiences for real users.

Hero

Eyebrow: ABOUT XPANDIA

H1: Spanish and English expertise for companies building across languages, cultures, and markets.

Subheadline: Xpandia helps AI, SaaS, EdTech, Product, Localization, CX, and Marketing teams validate, improve, and culturally adapt digital experiences for English and Spanish-speaking audiences.

Supporting copy: We combine senior Spanish/English language expertise, localization judgment, applied cultural intelligence, and product-aware QA to help teams build digital experiences users can understand, trust, and act on. [\(Revisar Tamaño de FUENTE en esta sección\)](#)

Primary CTA (Updated): Talk to an Expert

Who we are

Eyebrow: WHO WE ARE

Headline: A language firm specialized in Spanish/English quality, [adaptation](#), and cultural intelligence.

Body copy: Xpandia was created for companies that need more than translation. We support teams building products, content, AI experiences, support journeys, campaigns, and market strategies for Spanish-speaking users. Our work sits at the intersection of language, culture, product, and business judgment. We help teams understand what works in Spanish and English, what creates friction, what needs adaptation, and what is ready for real users. Xpandia gives teams the expert judgment and structured guidance they need to move from assumptions to confident, [informed](#) decisions.

Why Xpandia

Eyebrow: WHY XPANDIA

Headline: Spanish quality shapes trust, adoption, and growth.

Intro copy: Companies can generate, translate, or review Spanish/English in many ways. But when language affects product experience, customer trust, conversion, support, or market readiness, teams need more than language fluency or a quick review. Xpandia brings the structure, cultural context, product awareness, and senior judgment needed to understand what is working, what creates friction, and what needs to improve before a Spanish/English product reaches real users.

Core Value 1 — Senior language judgment: Expert review focused on linguistic quality, semantic accuracy, clarity, tone, terminology, fluency, and target audience alignment.

Core Value 2 — Localization and product context: Content evaluated or adapted directly within real-world software environments, UX flows, support channels, marketing assets, and EdTech platforms.

Core Value 3 — Applied Cultural Intelligence: Strategic cultural insights to decode trust signals, audience expectations, communication styles, and market fit.

Core Value 4 — AI and output evaluation: Structured audit of AI-generated outputs, chatbot interactions, virtual tutors, copilots, autonomous agents, and automated support flows.

Core Value 5 — Decision-ready evidence: Seamless delivery of scorecards, error taxonomies, severity ratings, annotated examples, and actionable executive readouts.

Core Value 6 — Practical business focus: Actionable recommendations tailored to streamline the workflows of Product, AI, Localization, CX, Support, Marketing, EdTech, and leadership teams.

Founder-led expertise

Eyebrow: FOUNDER-LED EXPERTISE

Headline: Led by senior expertise in language, localization, quality assurance, and cultural intelligence.

Body copy: Xpandia was built on a practical belief: language quality is a business issue. It shapes product experience, trust, customer understanding, market readiness, and growth. Founder-led and supported by a network of senior experts, Xpandia helps global teams turn language, localization, and cultural quality questions into clear business decisions. We combine linguistic precision, localization experience, cultural insight, multilingual business communication, QA thinking, and product-aware judgment to help teams turn complex language and cultural challenges into digital experiences that feel clear, trusted, and ready to scale.

Graphic Element: Photo of founder (Por fa centrar la foto, está un poco corrida a la derecha). [Nestor Solano - Founder, Xpandia Applied Cultural Intelligence SAS]

Biography Text: Nestor leads Xpandia's work at the intersection of language quality, localization, and Applied Cultural Intelligence. For more than 20 years, he has supported global teams, including work with Fortune 500 companies, across English-Spanish-Portuguese translation, language QA, localization management, Go-To-Market strategy, and cross-cultural communication in multilingual business contexts. Through Xpandia and its network of senior experts, Nestor brings the linguistic, cultural, and business judgment that teams need to evaluate, improve, and deliver digital experiences that are clear, trusted, culturally aligned, and ready for the English and Spanish-speaking audiences they serve.

How we work

Eyebrow: HOW WE WORK

Headline: Focused, practical, and structured processes for product teams that need to make data-driven decisions.

NOTE FOR PROJECTAPP: (transición secuencial en orden 1-4)

01 Context analysis and alignment: We align on your product architecture, target audience, language variants, business goals, timelines, content types, and current engineering challenges.

02 Tailored audit and adaptation: We apply the exact mix of expert language judgment, advanced localization, cultural intelligence, specialized QA criteria, and deep product awareness.

03 Decision-ready evidence delivery: You receive structured findings, prioritized fixes, fully adapted assets, scorecards, technical issue logs, and frameworks ready for your development team to deploy.

04 Deployment strategy and next steps: We empower your team to confidently execute the optimal next move: ship to production, fix, retest, adapt, train, govern, or scale.

Starting points (Pricing Matrix)

Eyebrow: STARTING POINTS

Headline: Start with the engagement your team needs now.

NOTE FOR PROJECTAPP: NO AGREGAR BOTONES DE BLOQUE VOLUMINOSOS AQUÍ. Formatear puramente como un texto limpio y estructurado con hipervínculos sutiles integrados que dirijan al formulario de contacto, según las instrucciones de la estrategia.

- **QA Diagnostics — From \$500** (For teams that need a fast expert read before choosing the right engagement.) [Request this engagement →]
